PREFACE.

The present edition is the outcome of a close study of the inscriptions on the Inner Railing and Gateways of the Buddhist Stūpa at Barhut in Central India according to a new plan. Instead of setting these inscriptions as they are found incised in order on the existing E. Gateway, component parts of the Quadrants of the Inner Railing, and several fragments, we have rearranged them in such a manner that we can unveil the system that underlies them and thereby make them truly significant. We have broadly distinguished them as Votive Labels and Jātaka Labels, grouping the former as they occur on the Gateway-pillars, the Rail-pillars, the Rail-bars, the Coping-stones, and the isolated Fragments, and grouping the latter as they are attached to different scenes in accordance with the accepted Jātaka-outlines of the Buddha's life. We have followed special numbering for each group, and also a general continuous numbering to facilitate reference. In interpreting the inscriptions we have not spared pains to collect as many parallels from literature as possible and proper. In spite of all the trouble taken and the care bestowed, we wish we could believe that we were any more than beginners. We feel grieved that Sir Asutosh Mookerjee is no more to receive a copy of this work as a gift and bless us with an open heart, which itself was far more than an earthly reward. We humbly dedicate the work itself to his sacred memory as he was the real inspirer of it and arranged for its publication just a month before he passed away at Patna. We are indebted to our friend Mr. Manindra Lal Sen, M.A., for assisting us in collecting some of the useful references, to Professor D. R. Bhandarkar, Dr S. K. Chatterjee, Dr. G. N. Banerjee and Dr. Stella Kramrisch for occasional suggestions, and no less to Mr. J. C. Chakravorti, M.A., Assistant Registrar, Mr. A. C. Ghatak, M.A., Superintendent, Calcutta University Press, and his staff for their readiness to oblige. One of us must thankfully acknowledge that it is Mr. R. D. Banerjee who initiated him into the study of the Barhut exhibits and inscriptions in the Indian Museum, Calcutta.

“Within the dominion of the Śuṅgas the gateway has been caused to be made and the workmanship in stone produced by Vātsiputra Dhanabhūti, son of ‘Gotiputa Āgaraju’ (and) grandson of King Gārgīputra Viśvadeva.” Tr

[C. p. 128, G.P.I. 1 (Pls. XII, LIII)—reads *rājño, Agarajasa, toranam, silakammata*. H. No. 1, cf. I. A., XIV, p. 138. L. No. 687. *Suganaṃ raje*=in the kingdom of *Sugana* (*Śrughna*) (R. L. Mitra & Cunningham); during the reign of the Śuṅgas (Bühler, Hultzsch, Lüders). *Gotiputa*=*Kautsiputtra* (C); *Gauptiputra* (HL). *Āgaraju*=*Agarāja* or *Agrarāja* (Mitra & Cunningham); *Aṅgāradyut* (Bühler,

Hultzsch, Lüders); *Silā-kammanto* = ornamented stone work (Mitra); stone-work (H L); masonry (H); works of piety, spiritual merit (C). *Upama* = Upāna, plinth (Mitra); *Utpanna* or *Uppanna*, gained, produced (C); arose (H). *Gāgīputa* = *Gārgēyīputtra* (Mitra), born of the Queen of the *Gārgēya* family (C). "The usage of calling sons after their mothers was caused, not by polyandria, as some Sanskritists have suggested, but by the prevalence of polygamy, and it survives among the Rajputs to the present day. In private conversation I have often heard a *Kuwar* called the 'son of the *Solankani*,' or of the *Gohilani*, &c. Here you will observe the Rani is called according to her family name, not according to her proper name; and you will know, from intercourse with the Rajputs, that the Ranis are always mentioned in that manner. Now all the metronymica of the ancient kings and teachers, both Buddhistic and Brahmanical, are formed by a female family name with the word *putra*. Thus we have *Vasishthiputra*, or *Vasithiputra*, *Sātakarni*, &c., and these names ought to be translated, 'son of the (wife) of the Vasishtha family,' &c. The name was just intended to distinguish the king or teacher from the other sons of his father by naming his mother according to her family name. There is another point connected with these metronymica which deserves attention: *viz.*, that the family names are all those of Brahmanical *gotras*. The explanation of this fact is that in accordance with the precepts of the *Smṛiti*, the Rajas were considered members of the *gotras* of their purohitas, and called themselves after the latter" (Bühler). The Pāli canonical literature contains a typical instance of metronymica in the expression *Rājā Māgadho Ajātasattu Vedehiputto* where the name of the mother of the king does not seem to have been connected with any *Rṣi* or *Purohita*. One cannot be quite certain about the identification of *Gotiputa* with either *Gauptīputra* as suggested by Hultzsch and Lüders or *Kautsīputra* as suggested by Cunningham and others. In some of the Sanchi and Sonari Stūpa Inscriptions we come across the name of a *Gotiputa* corresponding to the Pāli *Kotīputta*. It is difficult to say whether *Goti* was an *apabhraṃśa* of *Koṭi* or *vice versa*, whether *Koṭi* or *Goti* was originally derived from the name of a tribe and country or from that of any *Rṣi* or *Purohita*. Dr. Bühler is responsible for the equation of *Āgaraju* with *Āṅgāradyut*, which is but another name of *Maṅgalagraha*, the Mercury. It is difficult to understand the phonetic change of *Āṅgāra* into *Āgara*, while the change of *Agra* into *Āga* is very common in some of the modern Indian Vernaculars. *Rajusa* may have been used as a Genitive singular of *Rāja*, or else it may have been a clerical mistake for *Rājasa*.] N

[C. p. 132; Pl. 2 (Pl. LIII)—reads Bhūta. H. No. 23. L. 713. According to C's rendering *Bhadanta* is the designation of a lay brother, while *Aya* or *Ārya* is a designation which is the same in meaning as the English Reverend. H renders the two designations alike, i.e., as Reverend, in all other instances but those where *Bhadanta* and *Aya* are both used. L leaves them untranslated. In the Pāli Piṭaka texts *Bhadanta* has been used only with reference to the Buddha as a mark of respect.¹ In a later Pāli formula of invocation the deities are addressed as *Bhaddantā*, a mode of address which corresponds to the English 'Gentlemen' or the Bengali '*Bhadramahodaygaṇ*.' This latter spelling leaves no room for doubt that *Bhadanta* has connection with the Sk. and Pāli *Bhadra* and can, therefore, be Sanskritised as *Bhadrānta*, corresponding to a Bengali expression like '*Bhadrer Śeṣ*,' or '*Yār-par-nāi-bhadra*,' i.e., 'gentle to the extreme' 'perfectly gentle,' or 'perfect gentleman.' In the inscriptions recording the gift of three cave-dwellings made by Daśaratha, Aśoka's successor, the Ājivikas or Ājivika mendicants, to whom the gift is made, are referred to as *Bhādanta* Ājivikas, while in Aśoka's inscriptions they are introduced simply as Ājivikas. There is only one inscription, L. No. 99, in which *Bhadanta* or *Bhadanta* is used as the distinctive title of a Jaina monk. As regards Buddhist literature, the *Milinda* is perhaps the oldest work in which *Bhadanta* occurs as a mode of address of a Buddhist *Thera* who attained Arhatship and was proficient in the art of argument on all questions relating to Buddhism. In the Brahmanical writings *Bhadanta* is nowhere met with as a mode of address or a specific designation of a teacher. There are on the other hand numerous inscriptions in which *Bhadanta*, *Bhadanta* or *Bhayanta* is met with as the title or honorific designation of the Buddhist monks—*Bhikkhus* and *Sthaviras*. There can be no doubt that *Bhadanta* carries with it primarily the idea

¹ *Bhadante' ti te Bhikkhū bhagavato paccassosun.*

of gentleness. It is only in a secondary or derivative sense that the term denotes a person worthy of respect or veneration. There is some difference between 'Reverend Sir' and 'Venerable Sir,' the latter expression being applicable to persons of old age, to those who have become *Thera* or *Sthavira*. But we have got to decide whether *Bhadata* or *Bhadanta* has been applied in the Buddhist inscriptions as a general term of respect for all *Bhikṣus* or only for those who are *Sthaviras*. There are some inscriptions in which both *Thera* and *Bhadanta* are employed as designations of the Buddhist *Bhikṣu*, e.g., L. Nos. 451, 987, 993, 1006, 1007, 1012, 1020, 1040, 1041, 1060, 1080, 1081, 1082, 1083, 1089, 1094, 1171, 1223, 1250, 1289. It seems to be beyond any doubt that the term *Thera* is employed in addition to *Bhadanta* in order to denote a senior monk just in the same way that the term *Therī* is used in L. No. 1006, instead of *Bhikkhuni* or *Bhichuni* to distinguish a senior Buddhist Sister from an ordinary nun. So far as the Barhut Inscriptions are concerned, *Bhadanta* seems to have been used not as a term of respect for denoting an elderly member of the Buddhist order but simply as general designation of a *Bhikṣu* or *Bhichu* as distinguished from a *Bhikkhuni* or *Bhichuni*. We find that in instances where the donor happens to be a Buddhist nun, she is distinctly introduced as *Bhikkhuni* or *Bhichuin*, while in cases the donor is a monk, he is not called by contrast a *Bhikṣu* or *Bhichu*. The distinctive designation used in the case of a monk donor is *Bhadanta* and *Aya*. Among the Sanchi and Sonari inscriptions, on the other hand, we notice that in instances where the reference is to a deceased *Thera*, his characteristic designation is *Sapuriṣa*—'The good Man.' Further, we notice that in the labels in which the donor is expressly called a *Bhikṣu* or *Bhichu*, the designation *Bhadanta* or *Aya* is dispensed with, and *vice versa*. But coming to somewhat later Votive inscriptions couched in languages more or less affected by the Sanskrit phonology such as those found in Mathurā and other places, *Bhadanta* is applied as the designation of a monk donor who is also described as a *Bhikṣu* or *Śākya Bhikṣu*. Even there is an inscription at Amarāvati, L. No. 240, in which *Bhayaṃtī* (*Bhadantī*) is met with as the designation of a Buddhist nun. Thus these later Buddhist inscriptions can be shown to have made explicit what was implicit in the earlier ones. If *Bhadanta* be taken to be a general designation of a *Bhikṣu*, how does it differ from *Aya*, *Ariya*, or *Ārya* equally applied as the designation of a *Bhikṣu* or a *Bhikṣuṇī* with or without the additional designation *Bhadanta* or *Bhadantī* preceding it? It would be idle to dispute that *Aya* or *Ārya* is a specific designation of a *Bhikṣu* or of a *Bhikṣuṇī*. Those who do so can be referred to a large number

of the Jaina inscriptions that unmistakably prove the case. At all events, the Barhut label under notice shows that both *Bhadanta* and *Aya* were employed as designations of a *Bhikṣu*. If so, what is the possible difference between the two? In a passage of the Vinaya Sutta-vibhaṅga a number of *Theras* are referred to as *Ayyas*: "*Ayyo Sāriputto, Ayyo Mahāmoggallāno, Ayyo Mahākaccāno, Ayyo Mahākottḥito, Ayyo Mahākoppino, Ayyo Mahācundo, Ayyo Anuruddho, Ayyo Revato, Ayyo Upāli, Ayyo Ānando, Ayyo Rāhulo.*" All of these *Theras* were either *Arahats* or at least occupied one of the eight *Aryan* ranks. In one of the Amarāvati inscriptions, L. 1280, *Ayira* (*Ārya*) is applied as the designation of a monk donor who is said to have been an *Arhat*. Who is an *Aya* or *Ārya*? According to general usage, an *Aryan* is one whose condition is not servitude and one who is cultured. To the Buddhist, an *Aryan* is one who is not slave to passions, customs, conventions and dogmas, and is on the contrary, inwardly free and thoroughly enlightened, and lives a self-conscious life, always mindful and aware of the facts of experience. Master is the English word whereby *Aya* can be adequately rendered. *Bhadanta* is a common designation of all *Bhikkhus* or male members of the Buddhist monastic order, while *Aya* is the title of address of those *Bhikkhus* who are advanced in Aryanhood.] N

[C. p. 134; Pl. 27 (Pl. LIV). H. No. 45. Ho. No. 11. L. No. 738. C. takes *Bhānaka* to be the name of a place. *Bhānaka*=the Preacher (HL). *Bhānaka* is not the name of a place, it is simply an epithet. The word *Bhānaka* does not technically denote a preacher. Preaching is rather the function of a *Kathī* or *Kathika*. The essential duty of a *Bhānaka* consists in the recitation or rehearsal of the sacred texts with a view to preserving and handing them down by oral tradition. In Buddha's own words we can trace two expressions *Vādī*, meaning the upholder of an opinion, the propounder of a view, and *Kathī* or *Kathika*, denoting a preacher or an instructor. According to tradition, the institution of *Bhānakas* was of a somewhat later origin. The earliest tradition regarding the rise of the *Bhānakas* is to be found in Buddhaghosa's *Sumaṅgala-Vilāsinī*. This tradition is repeated in a much later work—the *Mahābodhi-vamśa* with a slight variation. According to this tradition, it so happened that during the session of the first Buddhist Council as soon as the *Vinaya* was recited and the *Vinaya* texts were compiled, the preservation of the *Vinaya* traditions and texts by regular recitation was entrusted to the care of the Venerable Upāli; when in the course of rehearsal of the *Dhamma* the *Dīghāgama* or *Dīgha-Nikāya* came to be compiled, the preservation of this text was entrusted to the care of the Venerable Ānanda; in a similar way the preservation of the *Majjhimāgama* or *Majjhima-Nikāya* was entrusted to the care of the disciples of Sāriputta, that of *Saṃyuttāgama* or *Saṃyutta-Nikāya* was entrusted to the care of the Venerable Kassapa, that of the *Ekuttarāgama* or *Aṅguttara-Nikāya* was entrusted to the care of the Venerable Anuruddha. Thus one is to conceive the rise of five Schools of *Bhānakas*, to wit, *Vinaya-bhānakā*, *Dīgha-bhānakā*, *Majjhima-bhānakā*, *Saṃyutta-bhānakā* and *Aṅguttara-bhānakā*. But curiously enough, throughout the Buddhist literature we nowhere meet with the expression *Vinaya-bhānakā*, while in Buddhaghosa's commentaries the views of the *Dīgha-bhānakas* and the rest are quoted by name and discussed. Even we have mention of *Dhammapada-bhānakā* in the *Atthasālinī*.¹ Buddhaghosa is really reticent about the origin of *Khuddaka-bhānakā*, though he expressly states that the *Khuddakāgama* or *Khuddaka-Nikāya* consisted of the books of the *Vinaya* as well as the *Abhidhamma-Piṭaka* in addition to the 12 or 15 books belonging to the *Sutta-Piṭaka*.² He does not explain why, if the *Vinaya* books were comprised within the *Khuddaka-Nikāya*, the *Vinaya* traditions were separately placed in charge of Upāli. Moreover, in the *Mahābodhi-vamśa*

¹ *Atthasālinī*, p. 18.

² *Sumaṅgala-Vilāsinī*, I. p. 12f.

we read that the *Khuddaka-Nikāya*, comprising the books of the *Abhidhamma-Piṭaka* and some books of the *Sutta-Piṭaka* was jointly rehearsed by the *Sthaviras* of the First Council and that the preservation of these texts was committed to the care of them all.¹ In a passage of the *Milinda* ² we have, among the citizens of the ideal *Dhammanagara*, the mention of :—

1. *Suttantikā*—Masters in the *Suttanta*, i.e., in the *Sutta-Piṭaka* ;
2. *Vinayikā*—Masters in the *Vinaya*, i.e., in the *Vinaya-Piṭaka* ;

8. *Saṃyutta-bhānakā*—The repeaters of the *Saṃyutta-Nikāya* ;
9. *Aṅguttara-bhānakā*—The repeaters of the *Aṅguttara-Nikāya* ;
10. *Khuddaka-bhānakā*—The repeaters of the *Khuddaka-Nikāya*.

Two facts are quite clear from this passage. First, that the function of a *Dhammakathika* was different from that of a *Bhānaka*. Secondly, that in the time of the *Milinda* there were in the country at least six schools of repeaters of *Jātakas* and those of the five *Nikāyas* (*passim* p. 27), which clearly proves that there was a separate collection of Commentary-*Jātakas* apart from one included in the *Khuddaka-Nikāya*. The first four *Nikāyas*, most of the *Vinaya* books and some books of the *Khuddaka-Nikāya* and the *Abhidhamma-Piṭaka* contain, beside the chapter arrangement of contents, divisions according to *Bhānavāras* or portions recited at a time. We can imagine that the *Bhānakas* represented, in institutions for popular instruction, persons noted for their power of memory and extemporising. The institution of *Bhānakas* has continued and survives till to-day in India and other eastern countries, where one can meet a number of persons getting things by heart for the purpose of recitation without any attempt to grasp their meaning.] N

“The rail-gift of the Noble Master Jāta, the Peṭakin, master
in the Piṭaka.” Tr

[C. p. 141; RI. 41 (Pl. LVI)—reads *jata sepetakino*. H. No. 134. L. No. 858. The epithet *Peṭakī* is derived from *Piṭaka* or *Peṭaka*, and means as Prof. Rhys Davids suggests, one who knows the *Piṭaka* by heart (Buddhist India, p. 167). *Piṭaka* or *Peṭaka* is a Buddhist technical expression signifying a definite literary redaction of Buddhist doctrine considered as closed, i.e., the Buddhist Canon. The *Piṭaka* is, according to Prof. Rhys Davids the traditional statements of Buddhist doctrine as contained in the *Sutta-Piṭaka*. This is not necessarily so. Let us take, for instance, the expression *Peṭakōpadesa* used as the title of an exegetical treatise on the general teachings in the *Piṭaka* or *Piṭaka* literature. The Canonical passages and verses quoted therein can be mostly traced now in the books of *Sutta* and *Abhidhamma Piṭakas*. The *Peṭakōpadesa* expressly quotes passages from the *Ekuttaraka* (the *Ekuttara* or *Anguttara Āgama* or *Nikāya*) and the *Samyuttaka* (the *Samyutta Āgama* or *Nikāya*). The *Peṭaka* of the *Peṭakōpadesa* may either mean something of the *Peṭaka* or something relating to the *Piṭaka* in a collective sense. *Tepiṭaka* or *Tipiṭaka* or *Piṭakattaya* is the commonest expression in Buddhist literature. The *Peṭakōpadesa*, be it remembered, contains, like its companion-work, the *Netti-Pakaraṇa*, a treatment of the scientific method of exegetical exposition of Buddha's doctrine in its two-fold aspect—the textual and the doctrinal, the formal and the material. The term *Piṭaka* seems to have been derived from the common parlance in which it meant a basket for carrying earth (*mattikā-bhājana*), cf. *kuddālapiṭakaṃ*, spade and basket.¹ Its alternative form *Peṭaka* corresponds to *petaka*, *petikā* or Bengali *peṭā*, meaning some kind of a box or case (*mañjusā*). In the Buddhist technical sense, too, the term *Piṭaka* or *Peṭaka* is taken metaphorically to mean *pariyatti-bhājana* or *pariyatti-mañjusā*, with this difference however that here it stands for both the container and the contained.² The suggested metaphors are quite appropriate from the Buddhist theological point of view, according to which Buddhist doctrines or traditions as rehearsed, collected and fixed at the First Council, were transmitted (*ābhata*) or orally handed down (*mukhapāṭhavasena*), from teacher to teacher,³ just in the same way that dug up earth is carried

in baskets from head to head till it is deposited and protected in the shape of a mound. It stands to reason to say that *Piṭaka* as a technical term is used exclusively by the Buddhists, but one must repudiate the suggestion that it was applied by them to denote only a part of their literature, namely, the Canonical. The Buddha himself as well as some of his immediate disciples are said to have used it with reference to the Vedic texts and traditions,¹ orally handed down in different schools, with the prevailing belief, 'so these were' 'so these were' (*anussavena itīha-itīha-paramparāya piṭaka-sampadāya*).²] N

 Judging by the general grammatical construction of the Votive Labels one cannot but take *Bodhicaka* as an epithet used in apposition with *Saṅghamita*. The precise significance of the epithet is not quite clear. It would have been interesting if it could be shown that *Bodhicaka*, as suggested by C, is used in contradistinction to *Dhamacaka*. In that case, one might conjecture that at the time of the construction of the Barhut railing, there were two distinct symbols in use among the Buddhists : one, namely, the *Bodhi-cakra*, characterising a tendency towards the ideal of Buddhahood, and the other, namely, the *Dharmacakra*, characterising the tendency towards the ideal of Discipleship. The rendering given by H and L is highly suggestive and can commend itself to our ready acceptance provided that it can be shown that the label is attached to an actual symbolical representation of *Bodhi* on the Barhut railing. It is not unlikely that Bodhicakra, like Ekacakra in the Pauranic list of places, is the name of a locality.] N

Buddhist Stūpa II. inscription L. No. 635. *Paṃcanekāyika*—an epithet of the monk *Devagiri* in the Sanchi Stūpa I. Inscription L. No. 299. *Paṃcanekāyika* or *Pañcanāikāyika* is derived from *Pañcanikāya*, and means one who is conversant with, i.e., knows by heart the Five Nikāyas (Buddhist India, p. 167). *Pañcanikāya* occurs in the *Vinaya Cullavagga*¹ as a collective designation for one of the two divisions of the Buddhist Canon therein recognised, the other division being represented by ' *Ubhatto-Vinaya*.' The Milinda quotes passages from the books of the *Sutta-Piṭaka* bearing such titles as *Dīgha-Nikāya*, *Majjhima-Nikāya*, *Saṃyutta-Nikāya*, and the rest. In Buddhaghosa's commentaries,² on the other hand, the expression signifies not only the five well-known collections of Buddha's discourses or dialogues enumerated as five classical divisions of the books of *Sutta-Piṭaka* but also a general fivefold division of the entire Buddhist Canon, the *Khuddaka-Nikāya* including, over and above the usual 12 or 15 Sutta books, all the books composing the *Vinaya* or the *Abhidhamma Piṭaka*. Curiously enough, except in the sense of a sect, school or denomination, the term *Nikāya* is not found in use among all the Buddhists. From this one may be naturally led to suppose that *Nikāya* in the sense of a Canonical division is a technical term exclusively used by a particular Buddhist sect or school, namely, the *Theravāda* or *Sthavira*. The expression found in the literature of other sects and schools corresponding to Pāli *Nikāya*, such as that in the *Divyāvadāna*—a *Sarvastivāda* work, is *Āgama*.³ Even in the Pāli discourses ascribed to the Buddha himself, the expression *Āgama* is often met with, no doubt in the sense of a floating body of Buddhist literary traditions, either with their twofold division *Dharma* and *Vinaya*, or with their triple division *Sutta*, *Vinaya* and *Mātikā*.⁴ Whatever the later Buddhist explanations of these expressions, they seem to have been manipulated with the express object of indicating a traditional character of the original body of Buddha's doctrine.⁵ Thus one need not be surprised that in the *Dīpavaṃsa* account of the proceedings of the First Buddhist Council the *Dhammasaṅgaha* is otherwise called *Āgama-Piṭaka*. What is the special significance of *Nikāya* applied as a designation for a Canonical division? Buddhaghosa says that *Nikāya* in its ordinary usage

means *samūha* and *nivāsa*, and that in this respect there is no difference between its common and technical sense. For instance, the *Dīgha-Nikāya* means the group, aggregate, set or receptacle of the long discourses.¹ In the earlier Jaina and Buddhist usages, *Nikāya* appears to have been used as a biological expression, meaning a particular class, type or species of living beings, cf. *chajīva-nikāya*,² a technical term in use among the followers of Pārśvanātha, denoting six divisions of living beings, those possessed of one sense, those of two senses, and the rest. In the Ājīvika phraseology, the expression *cha-jīva-nikāya* was replaced by *chaldbhijāti*³ or *ṣaṭjīvaravarnā*⁴ and in the Jaina phraseology by *cha-leśiyā*, meaning the living beings of six mental types. In Buddha's discourses⁵ and in Pāṇini's Sūtras,⁶ the term *Nikāya* has a similar biological significance. According to Buddha, a *jāti* or *nikāya* denotes a self-contained class of beings, two *jātis* being mutually exclusive (*aññamaññāhi jātiyo*).⁷ One must understand that when *Nikāya* came to be applied by the Buddhists to their Canonical books and divisions, they intended to signify that Buddha's doctrine was no longer in a fluid condition, but assumed definite shape and character, each division of it having an independent position of its own in the whole body of literature.] N

[C. p. 131; CI. 16 (Pl. LIII. 16). H. No. 16. L. No. 705. This is the second Votive label to be found engraved on a coping-stone (Coping VIII) of the existing Barhut railing. It lends itself to a two-fold interpretation according as the word *nigama* is taken either in the sense of a town or in that of a trader. Taking it in the former sense, the label must be construed as implying that the gift referred to was made jointly by the citizens of *Karahakata*, *nigama* standing for *naigama*. Taking it in the latter sense, the label must be construed to mean that the gift was that of an individual donor who was a trader in the town of *Karahakata*, *nigama* standing for the Pāli *negama* or the Sk. *naigama*. The controversy does not end here. One has got to decide whether the copings surmounting the entire railing were the gift of an individual trader donor or that of the whole population of *Karahakata*, identified by Hultzsch with modern *Karhād* in the *Sattārā* district.¹ It appears that the copings were superadded to the railing woven of pillars and rail-bars and intersected by the gateways; the symmetry of their joinings and carvings goes to indicate that these were designed by the single artist. The tradition of symmetry thus associated with the copings with their costly ornamental designs of continuous scroll-work and bas-reliefs might be carried to a further point, if it could be established that as these were the designs of one artist, so these were the gift of one donor. But in view of other weighty considerations, stated below, this must be tabooed as a mere intelligent suggestion. From the occurrence of such expressions in some of the Votive labels as *thabho dānaṃ* (gift of a pillar) and *suci-dānaṃ* (gift of a rail-bar), it follows that almost every pillar or every individual rail-bar was the gift of an individual donor. Even there are indications to prove that almost every Jātaka-scene or group of Jātaka-scenes was sculptured on the strength of an individual donation. If so, it would seem improbable that the whole series of copings with all their ornamental paraphernalia was the gift of a single donor, however rich he might be. If the label were meant to record the gift of an individual donor, it would have, as in other cases, recorded the personal name of the donor along with his professional designation. This being not the case, one must be inclined to conclude that the label was really meant to perpetuate the memory of the whole body of citizens.] N

[The origin of the word *bhaga* can be traced to an Indo-European root like *phagus*, meaning 'to eat,' 'to enjoy.' The words *bhāgya*, *bhaga*, *bhāgī*, *bhaginī*, *bhoga*, *bhūñja*, *bhoja*, *bhakṣa*, *bhakṣya* and *bhakti* may, so far as this fundamental meaning is concerned, be taken as coming from the same root, their underlying idea being one of enjoyment and apportionment.¹ The Indo-Aryan *Bhaga* with its European counterparts *Begu* and the like is found to be the name of an old Aryan god, representing, no doubt, a distinct aspect of Godhead, i.e., primarily God as the giver of food or things of enjoyment, and secondarily God as the ordainer and distributor of possession and prosperity. Thus one need not be surprised that in the Rg-Vedic *Śraddhā*-hymn,² *Bhaga* has been represented as the embodiment of possession and prosperity. For the primitive man, no less than for the primitive in the man of to-day, food in the sense of satisfaction of the two cardinal appetites of animal life may be held to constitute the possession and prosperity. The possessor of this twofold satisfaction and the means thereof is in theory the *bhagavān* or *bhāgyavān*. The primitive idea of possession and prosperity has undergone modification by way of both elimination and supplementation—by emphasizing the finer and relegating the grosser elements to the background. But however sublimated the idea of *bhaga* or *bhāgya* may have been, the idea of possession and prosperity is always there. We come across the word *bhagavān* in the

¹ The *Mahāniddesa* (pp. 142-143) and the *Paramatthajotikā* (I, pp. 107-109) contain the following dissertation on the word *bhagavā*. "The epithet *bhagavā* or *bhagavān* was bestowed on the Buddha neither by his parents nor by his other relations. It was acquired by him on his attainment of omniscience. *Bhagavā*—*bhagayutta*, one endowed with *bhaga*, which in its generally accepted sense means the sixfold supreme possession of *issariya*, *dhamma*, *yasa*, *sirī*, *kāma*, and *payatana*. *Issariya* comprehends the idea of such qualities as *aṇimā*, and the rest. *Dhamma* means transcendental virtues. *Yasa* implies a pure fame of universal recognition. *Sirī* connotes an all-round accomplishment. *Kāma* signifies all objects of desire or all desired objects. *Payatana* means the supreme effort to gain sovereignty over all. *Bhagavā*—*bhājī* or *bhattavā*, one who has a recourse to, i.e., has the experience of, all things. *Bhagavā*—*bhāgī*, participator of all acquisitions. *Bhagavā*—*vibhattavā*, one who explains things by proper apportionment or method of analytical distinction. *Bhagavā*—*bhaggakārī*, the breaker or destroyer of all evils. *Bhagavā*—*garu*, the master who is superior to all. *Bhagavā*—*bhāgyavā*, the fortunate or blessed one. *Bhagavā*—*bhavantaga*, one who has gone beyond individual existence. *Bhagavā*—*subhāvitatta*, who has fully developed himself."

² Rg-Veda X, 151: *Śraddhām Bhagasya mūrdhvasi vacasā vedayāmasi*.

Indo-Aryan literature at a time when man became fully conscious of his dignity as man and of his potentiality to the extent of attaining Godhood and Divinity. The term became quite familiar by the time of the Buddha when the idea of material possession and prosperity began to be supplanted by that of ethical, intellectual and spiritual attainments. The Sk. *bhāgya* and *bhagna* are both in Pāli *bhagga*, allowing the Buddhists a room for displaying their ethical bias and interpreting *bhagarā* or *bhagarān* as meaning one who has broken the bonds of passion, hatred and delusion. The sense in which the word *bhagarān* is used in the labels shows again the predominance of the tangible manifestations of human greatness and goodness; that is to say, the meaning is quite consonant with the growing *Bhagavatism* of the day which invaded even the Buddhist system. Höernle has very rightly suggested that the word *bodhi* referring apparently, in a physical sense, to the *Bodhi* or *Bo Tree* is inseparably associated with the idea of *bodha* or enlightenment. According to the definition suggested in the *Mahāpadāna-Suttanta*, a *Bo Tree* is one at the foot of or under which (*yassa mūle, yassa rukkhassa hetthā*) a *Buddha* or more accurately, a *Bodhi-sattva* becomes truly awakened or enlightened. "Trees there are many others. Of these, only those trees, at the foot of which the Buddhas penetrate *bodhi* in the sense of a knowledge of the Four Truths constituting the way, are called *Bodhi* or *Bo Tree*."¹ *Sambodhi* of Aśoka's Rock Edict (No. 8), like *bodhi* of Barhut labels, seems to imply a twofold meaning, with this difference, however, that in the former the physical meaning is over-shadowed by the spiritual, and what is more, the *Bo Tree* as denoted by *bodhi* of the Barhut labels stands as a symbol for the entire life and career of a Buddha.

The names of the last six or seven Buddhas which are found recorded in their genitive forms on the Barhut railing suggest a problem of some importance. The names of the six Buddhas and the supposed missing name of *Sikhi* are all phonetically akin to those in Pāli: *Vipasi* = *Vipassī*; *Sikhi* = *Sikhī*; *Vesabhu* = *Vessabhū*; *Kakusadha* = *Kakusandha*; *Konāgamena* = *Koṇāgamana*; *Koṇāgamana* = *Konākamana* (Aśoka's Niglīva Pillar Edict); *Kāsapa* = *Kassapa*; *Sākamuni* = *Sakyamuni*. These names are Sanskritised almost alike in the *Divyāvadāna*, the *Lalita-Vistara* and the *Mahāvastu*: *Vipāsyī*; *Sikhī*; *Viśrabhū*; *Krakucchanda* (*Krakutsanda*, an alternative form in the *Mahāvastu*); *Kanakamuni*; *Kāśyapa*; *Śākyamuni* (*Sakyamuni* in Aśoka's Lumbinī Pillar Edict, *Sākyamuni* or *Sakyamuni* in Pāli). Curiously enough, the genitive case-endings of the Barhut names seem to have

¹ *Sumaṅgala-Vilāsinī*, Siamese Ed., II, p. 13.

followed, upon the whole, a tradition other than Pāli: *Vipasino* = Pāli *Vipassissa*, *Divyā*, *Vipaśyino*; [*Sikhino* = Pāli *Sikkhissa*, *Divyā*, *Śikhino*]; *Vesabhuno* = Pāli *Vessabhussa*, *Divyā* and *Mahāv*. *Viśrabhuvah*; *Konāgame-nasa* = Pāli *Koṇāgamanassa*, *Divyā*, *Kanakamuneh*, *Mahāv*. *Kanakamunino*; *Sākamunino*—*Lalita-Vi*. and *Mahāv*. *Śākyamunino*.

The Pāli books preserve *ex-hypothesi* the tradition of the *Sthaviras*; the *Divyāvadāna* and the *Lalita-Vistara*, that of the *Sarvāstivādins*; the *Mahāvastu*, that of the *Mahāsaṅghikas*. The comparative study of Buddhas' names and their genitive forms enables one to think that the dialect or dialects in which the original Buddhist traditions were handed down bore phonetically a close resemblance to Pāli, and that the discrepancies arose and became more and more detectable from the time when the different Buddhist sects and schools tried in different parts of India to write in Sanskrit. The diversity of case-endings, *e.g.*, in the case of *Vipassī*, seems to have arisen from the fact that the Buddhists forgot it was derived from the Sanskrit *Vipaścit*, and was at the same time reluctant to equate it with *Vidassī*. A similar argument would lead one to hit upon *Viśvabhṛt* or *Vaiśyabhū* as the Sanskrit form behind *Vessabhū*. The designation *Sākamuni* seems to have been manipulated at a somewhat late stage of Buddhism, though it came into use, as evidenced by Aśokan inscriptions, as early as the 3rd century B. C. It would seem unfortunate that the epithet *muni*, which in its generally accepted sense was sought to be got rid of by the Buddha for its mystical associations,¹ came to be connected with his name. Mere quietude for its own sake was never the ideal of the Buddha. *Munihood* or quietude as an attribute of Buddhahood was intended to represent only an ecstatic mood whereby the Buddha could remain untouched and unperturbed, unshaken and unsubdued, even in the midst of horrific terrors. This aspect of Buddhahood came to be much emphasized with the growing ascetic tendencies of a certain section of the Buddhist order.] N

“These four labels refer to the scene of the deities or angels, both of the Kāmāvacara and the Rūpāvacara Devalokas, entreating with folded hands the Bodhisattva, then a god of the Tuṣita heaven, to come down on the earth to be born as man—some standing to the east, some to the west, some to the north and some to the south of the Bodhisattva, who gave his consent after his observations of place, time and the rest.” E

[The expression *puratthima-diśam* or *purastima-diśam* seems to be quite peculiar to Buddhist literature. The Sanskrit *purastāt* with which *puratthima* has some affinity, is evidently an adverbial expression, with the Ablative case ending used in a Locative sense, it being a synonym for *prācyām diśi*, ‘in the eastern quarter.’ As the parallel expressions from the Sanskrit Buddhist works go to indicate, the word *purastima*, met with in the Mahāvastu (I, p. 40), came to be replaced by *pūrvasyām* when the Buddhist literary dialects were sufficiently Sanskritised. The Buddhists usually enumerate the four cardinal points in the order of East, South, West and North.¹ The Barhut labels show a departure from this traditional mode in that they intend to place the north after the east and before the south. Portion of the existing bas-relief, which is broken, bears faint traces of first four letters of an inscription pointing to the west, and

¹ E. g.—*Pūrva-dakṣiṇa-pāścimōttarābhyo diḡbhyo bahūni devaṣatahasrāṇi sannipatī-tānyabhuvan*, Lalita-Vistara, p. 52.

it goes without saying that a fourth inscription having reference to the west and the deities of eight intermediate *Rūpabrahmalokas* is a desideratum, for the three labels, pointing to the east, the north and the south, do not exhaust the list of the deities who are ordinarily known to have inhabited six *Kāṃāvacara devāloka*s and sixteen *Rūpabrahmaloka*s extending up to the *Akaṇiṣṭha* heaven.¹ The five highest *Rūpabrahma* heavens, *Aviha*, *Atappa*, *Sudassa*, *Sudassī*, *Akaṇiṭṭha*, are called *Suddhāvāsa*, the Pure Abodes (Childers, *Sub-voce* Sattaloka). The third label seems to refer to the *Brahmakāyika* deities, i.e., the dwellers of the three lowest *Rūpabrahmaloka*s, the *Brahmapūrisajjas*, the *Brahmapurohitas*, and the *Mahābrahmas*. In certain passages of the *Lalita-Vistara*, the deities are divided into four classes instead of into five, to wit, *Suddhāvāsa*, *Ābhāsvara*, *Brahmakāyika* and *Śuklapāṇḍika*. The fourth label mentions six thousand gods or angels inhabiting the six *Kāṃāvacara* heavens—the *Cātummahārājika* (*Cāturmahārājika*), the *Tāvatiṃsa* (*Trayatrīṃsa*), the *Yāma*, the *Tusita* (*Tuṣita*), the *Nimmāṇarati* (*Nirmāṇarati*), and the *Paranimmitavasavattī* (*Paranirmitavaśavartī*). *Savataniśa* may be equated with Sk. *Sarvatranīśrita* or *sarvātmanīśrita*, meaning those who have a recourse, an access or a connexion everywhere, in all places, i.e., in all concrete existents or individualities. In the Buddhist mythology, a *Brahmakāyika* god like *Sanatkumāra* is said to make his appearance before the gods of the six *Kāṃāvacara* heavens, assuming a universal form, a form which all the *Kāmaloka* gods regard as their own self (*sabbadevā tassa attabhāvaṃ mamāyanti tādisaṃ yeva*).² According to the *Janavasabha* and *Mahāgovinda Suttas* of the *Dīgha-Nikāya*, no seat was required to be allotted for *Sanatkumāra* in the assembly of the *Kāṃāvacara* gods in the *Sudharmā*-hall, it being his custom to honour a particular god by sitting on his lap, while all the gods sit cross-legged anxiously expecting his presence.] N

“The scene of a celestial musical performance consisting of the dances, songs and concerts of the apsarasas and expressive of the joy of the gods over their success in inducing the Bodhisattva to be born in the womb and in anticipation of the happy advent.” E

[The order of the five labels attached to the above scene calls for a comment. The label put first in this monograph has been engraved, as noticed by Cunningham, below the four labels referring to the four dancing *apsarasas*, and below and at one side of the scene itself. The order in which the *apsarasas* have been enumerated by Cunningham, Hultzsch and Lüders is warranted neither by the scene itself where prominence is accorded to *Alambuṣā* the heavenly dancer in the centre, standing pointedly behind the child on its right side, nor by the traditional lists except one in the Mahābhārata and the Purāṇas in which *Miśrakesī* has been given the precedence over *Alambuṣā*. In the Harivaṃśa list quoted by Cunningham, the name of *Alambuṣā* stands before that of *Miśrakesī*. So in the Vimāna-Vatthu list of twelve *apsarasas* mentioned by name,¹ *Alambuṣā* comes

before *Miśrakeśī*, the latter before *Puṇḍarikā* corresponding evidently to *Padumāvatī* of the label, and she before *Subhaddā*. In the Mahāvastu list of 32 celestial damsels (*deva-kanyā*), divided into four groups of eight each and allocated to four quarters, *Alambusā* stands before *Miśrakeśī* among the damsels of the western quarter, while the name of *Padumāvatī* is found among the damsels of the northern quarter, usually coming after the western. The identification of *Puṇḍarikā* with *Padmāvatī* is not justified by the Lalita-Vistara list where *Padmāvatī* is mentioned as a divine damsel other than *Puṇḍarikā*.¹ But it seems likely that the conception of *Padmāvatī* was a later offshoot of the earlier conception of *Puṇḍarikā*. The prominence given to *Alambusā* is clearly brought into relief in the Pāli Alambusa-Jātaka (F. No. 523) where she had to be selected from amongst 2½ crores of heavenly courtezans as the only agent of seduction of the Bodhisat *Isisīṅga* of great ascetic vow. The Vimāna-Vatthu and the Mahāvastu lists of the apsarasas have each an importance of its own. The former mentions twelve names of which four appear in the Barhut labels, and the Barhut scene itself contains twelve figures. The peculiar importance of the latter consists in the allocation of the damsels to different quarters and spelling of the names of *Alambusā* and *Padumāvatī* is almost the same as that of the Barhut labels. The names themselves are suggestive of personal accomplishments, as hinted at in some of the ballads of the Vimāna-Vatthu.² For instance, *Miśrakeśī* is one with chequered coiffure; *Alambhūṣā*, transformed into *Alambusā* means one endowed with beauty enough to dispense with all artificial ornaments—one best adorned while unadorned. In the 69th chapter of the Vāyu-Purāṇa, the *apsarasas* are broadly divided into two classes—(1) *Laukikī* or *Mauneyā*, and (2) *Divyā*. According to this division, *Miśrakeśī*, *Alambusā*, and the remaining 32 *apsarasas* fall under the *Laukikī* class. They were, according to the Pauranic description, noted for their peerless beauty and quick movements; the *Divyā* class naturally includes the *apsarasas* mentioned in the Veda, *Menakā*, *Rambhā* and the rest. The expression *devānaṃ* seems to be intended to convey both a possessive and an adjectival sense; in its adjectival sense it is the same as *divya* or celestial and qualifies *turaṃ* before it, cf. *pañcāpsaraḥ aśasrāṇi divya-tūrya-saṅgīti-sampravāḍitena* (Lalita-Vistara, p. 110).

¹ Lalita-Vistara, p. 890.

² *Alambhus* in Bengali means an idle, worthless fellow. Cf. the Epic *Alambusāḥ Ghatotkacāḥ*.

The word *tura*, *turiya* or *tūrya* appears to have been used in the Buddhist literature in the triple sense of musical measure (*tāla*, *tāḍa*), musical instrument, and playing on musical instruments with or without the accompaniment of dancing, singing and the rest. In some of the Buddhist works we have mention of some three musical measures, viz., (i) *pāṇissara*, *kāṃsatāla* or *pāṇitāla*; (ii) *Vetāla* or *ghanatāla*; (iii) *kumbhathūpa* (*udaka-vādyā*) or *caturassa ambhanaka* or *ammaṇa tāla*. The *turiya* in the sense of musical instruments is said to be of five kinds (*pañcaṅgika-turiyaṃ*, *pañca-turiyaṃ*);¹ (i) *atata*—the drums covered with leather on one side; (ii) *vitata*—the drums covered with leather on both sides; (iii) *atata-vitata*—the drums completely covered with leather; (iv) *ghana*—instruments played by striking, such as cymbals, tambourines and bells; (v) *susira*—wind instruments (Childers *sub voce*). *Sammadaṃ*, Pali *sammadaṃ*, Sk. *sammadam* or *sammodam* means literally that which causes intoxication or exhilaration, cf. Pāli *bhatta-sammada*, drowsiness due to a heavy meal (Childers *sub voce sammada*). Here it seems to mean that which is delightful or rapturous (*manoramam*, *manojñam*), i.e., *sammada* = *sammoda*.² If *sammada* could be rightly equated with *sammata*, it would mean considered or estimated, *Sāḍika* is a most baffling word. It seems to have affinity first with Pāli *sāḍikkha*, *sārikkha*, and Sk. *sadrka*, *sadrkṣa*, meaning suitable to or befitting the occasion; secondly with a word like *śāṇḍika* meaning appertaining to a group or assembly, as well as *sātika* or *sādika* meaning that which is pleasing to the senses (*savaṇeyya* or *śravaṇīya*). It may as well be equated with a word like *sāduka* or *svāduka* meaning that which is sweet. It seems more probable that *sātika* here stands for *sātikā* or *śātikā*, meaning dress or professional equipage, i.e., what is aptly called in the Buddhist works the *ābharaṇa-bhūṣā* of the *apsarasas*. The suggestion that *Sāḍika* is the same as *Sātaka* or *Sattaka* in the sense of a kind of dramatic performance (*nāṭaka-bheda*) seems quite convincing, if it can be proved that *Sātaka* was either in existence or was recognised as a distinct class of drama at the time when the Barhut railing was erected. This is not however to suggest that *tura* or *turiya* of the label excludes the idea of a dramatic performance. Though the primary idea of *turiya* is instrumental music (*vādita*, *vāditra*), that of *saṅgīta* is singing (*gīta*), and that of *nāṭya* or *nāṭaka* is dancing (*nacca*, *nṛtya*),³ they are found to be inseparably bound together,

as well as associated with scenic representation, ballad-recitation and acting. At any rate, these things happen to be invariably mentioned or implied in Buddhist literature, wherever there is reference to the *tūryyas* of the *apsarasas* and of the royal courtezans collectively called *nāṭaka*, *nāṭakī* or *nāṭaka-stri*.] N

[*Ūkramṭi*, *okkanti*, *avakkanti* or *avakṛānti* means in popular usage conception or commencement of maternity. Three factors are said to be indispensable to conception : (1) parental union, (2) maternal competence, and (3) transmission of the paternal element.¹ The process of conception, as commonly held, implies a combination or unification of paternal and maternal elements.¹ *Avakṛānti*, *avakramaṇa* or *avataraṇa*, as opposed to *utkrānti* or *utkramana*, means the descent, ingress or intrusion of the vital spirit from a particular embodiment or corporeality, cf. the Upaniṣadic expression *utkrānta-prāṇān*.² The association of the idea of coming and passing with the vital spirit is a matter of almost universal belief. This latter

belief implies the addition of the vital spirit coming from outside to the unified parental elements whether at the moment of parental union or after certain stages of gestation, when the skull and brain are formed,¹ and this is at the root of the religious rite called *prāṇa-praśiṣṭhā* of images. Side by side with these beliefs, there has sprung into being another, which is by far the most daring and spiritual and suggestive of the immortality of divine personality. This is no other than that of the belief in the bodily descent and resurrection.² It is on this phase of belief that the Indian doctrine of incarnation seems to have been based, the doctrine which is characteristically Bhagavatic. And it is precisely in this Bhagavatic sense that the expression *ūkranti* seems to have been used in the Barhut label and the Jātaka texts quoted above from the Buddhist literature. As for *avakrānti*=*ūkranti*, cf. Pāli *avahaṇa*=*ūhaṇa*.] N

Vejayamṭo Pāsādo stands last. This may be justified only by construing
Vejayamṭa-Pāsāde as a locative phrase. The palace is called *Vejayamṭa* not
because it belongs to Indra, the Victorious, but because it rose up, as stated
in the Kulāvaka-Jātaka at the time of Śakra's or Indra's victory over the

Demons.¹ *VeJayanta* or *VaiJayanta* occurs also as the name of Indra's royal car or mansion (*ratha. nimāna*), *VaiJayantī* or *VaiJayantika* denotes the royal flag or banner flying over the *VaiJayanta* car and palace. According to Buddhist mythology, the famous Council-Hall of Indra's heaven came to be called *Sudharmā* after and in commemoration of *Sudharmā*, a pious queen of Magadha.² Höernle seems quite justified in thinking that here *sabhā* refers not so much to the Council-Hall as to the assembly of the gods itself. All the three labels refer to a scene forming a sequel to the Bodhisattva's self-initiation into asceticism, technically described as *Bhagavato Pabbajjā* in the *Dīgha* II, p. 51.] N

E

[The term *Dharmacakra* seems to have been coined on the analogy of *Brahmacakra* and in contradistinction to *Sudarśanacakra* considered as a mere weapon of destruction. The ideas governing the conception of *Brahmacakra* are astronomico-cosmical and physio-psychological, and suggest a double metaphor of a chariot wheel, the rolling of which symbolises the cyclical motion of time, seasons and the rest, and of the potter’s wheel, the creative movements of which symbolise the creative functions of the cosmic forces. Buddha’s *Dharmacakra* at once supplements and transcends the earlier scientific conceptions of *Brahmacakra* and rectifies the popular, fanciful and poetical notion of a vehicle moving towards the paradise. That is to say, Buddha’s conception of *Dharmacakra* is transcendental idealistic as opposed to the empirico-idealist position of older Vedānta, and abstract as opposed to the concrete of popular mythology and poetical imagery. With the development of the idea of Buddhism as a path of

¹ The label is deliberately placed here. It has a different significance in the Barhut context, see *passim*.

salvation, the old Indian popular and fanciful notions crept in and the abstract conception of *Dharmacakra* degenerated into what it was originally designed to supplement, transcend and rectify, namely, into that of the wheel fitted with a vehicle, bodily moving to the paradise. This transition of thought is vividly represented in the following Samyutta-verse (S.I. p. 33) :

*Ujuko nāma so maggo, abhayā nāma sā disā,
Ratho akūjano nāma dharmacakkhena samyuto.*

The Buddhists have not always been able to observe the nice distinction between the *Dharmacakra* as the enunciation of a law and its literary representation in the form of a Discourse and in cases, the two are hopelessly confused. But we must take the *Dharmacakra* as occurring in the label here in the sense of a particular event of Buddha's life]. N.

[*Jaṭila* literally means ‘One who wears matted hair.’ According to its technical meaning, the term signifies a class of ascetics marked out by the matted hair worn on their head. The *Kēśis*, as described in a Ṛgvedic hymn, were a class of ascetics who used to wear long loose locks of hair. The wearing of matted hair and garments made of bark (*jaṭā-vaḥkala*) was the common outward characteristic of the ancient Indian order of hermits, of *Ṛṣi-pravrajyā*. The *Ṛṣis* and *Munis* were members of the older *Vānaprastha* order. The members of this order lived in hermitages, with or without family. This order was essentially based upon the domestic principle. There were elements of corporate life in this order. We hear of the band of *Vāḥkilya ṛṣaya* or saintly pigmies living

together in one place. The *Jaṭilas* referred to in the Barhut label were not solitary hermits. They formed three large bodies of ascetics each following a distinct leadership. It is this corporate life which marked them out from the ordinary members of the *Vānaprastha* order. They formed a connecting link between the *Vānaprastha* and *Parivrājaka* orders. They were not mendicants like the Wanderers. *Sabhā* primarily connotes the idea of a court, and indirectly of any assembly or association, where the behaviour of the members is courtier-like. The distinctive feature of a *Sabhā* in its general sense is sitting in rows in appointed seats according to ranks of the members, and it can perhaps be taken to suggest the idea of a hierarchical arrangement and gradation.] N

“The scene of dedication to the Buddhist Order, with the Buddha at the head, of Jeta’s Garden as a monastic residence, along with all new additions of buildings, pavilions and the rest, by Anāthapiṇḍika, the great banker, who had to purchase the garden from Prince Jeta for cartloads of 18 crores of gold pieces, sufficient to cover almost the whole plot of land.” E

[*Jetavana* is the famous Buddhist monastic residence in a suburb of Śrāvastī. This is otherwise known as *Anāthapiṇḍika’s* or *Anāthapiṇḍada’s ārāma*. The former designation, according to a Buddhist Commentary,¹ commemorates the name of the former owner of the garden, *i.e.*, of Prince *Jeta*, son of King *Prasenajit*,² and the latter designation bears the name of its subsequent owner, *i.e.*, of the Banker *Anāthapiṇḍika*. It is suggested that such commemoration was intended to serve as an inducement to others for the acts of piety. Although Prince *Jeta* sold his garden for a huge sum of money, it is stated in the *Cullavagga* (p. 159) that he added a large number of gold pieces to those of *Anāthapiṇḍika* to complete the covering of the land with coins, and there is no clear indication that Prince *Jeta* received the money from the purchaser for himself. On the other hand, the *Cullavagga* account creates an impression that he supplemented the sale proceeds by his own contribution for the conversion of his pleasure-garden into a Buddhist monastic residence. This is clearly borne out by the evidence of the Commentary, referred to above, in which we are told that the prince had not only parted with the sale proceeds but made some additional gifts which, added to *Anāthapiṇḍika’s* princely donation, just sufficed to complete the project. Cunningham is right in saying that the *Gandhakuṭi* and the *Kosambakuṭi*, used by the Buddha as his private chambers, were not in the original garden. The word *Kosamba* has nothing to do with *Kauśāmbī*, the capital of the Vatsa country, as suggested by Hultzsch. It seems to be a Pāli counterpart of Sk. *Kausumīha*, meaning sweet-scented, or literally, bearing the perfume of *Kusumbha* flower. *Keto*

[*Timiṅgila* is just one of the three species of the leviathan wrongly considered to be fishes, two other species being *Timi* and *Timiṅgilagila*.¹ The distinction between them seems to rest on their bodily shapes and sizes. *Timi*, *Timinda* or *Timiṅgila* is, according to Childers, the name of a certain fish of enormous size that haunts the oceans between the *kulācalas* (Anglo-Pāli Dict., *sub voce* *Timi*). The Pāli Mahāsutasoma-Jātaka (F. No. 537) recognises six species of monster fishes in the ocean, amongst whom *Ānanda*, *Timanda* (*Timinda* ?), and *Ajjhohāra* are said to be 500 leagues in compass, and the three varieties of *Timis*, represented by *Timi*, *Timiṅgala* and *Timirapiṅgala*, are described as being each 1000 leagues in length—all of them feeding upon the rock-*śaivāla* weed, the aquatic plant *vallisneria*.² In the Ulūka-Jātaka (F. No. 270) *Ānanda* is represented as the king of fishes. It is impossible in the absence of the original inscription to verify Cunningham's eye-copy or to suggest relying thereon that in *mahādevānaṃ* we have a Genitive plural form, used in an Instrumental sense, though such instances are not rare in the dialects of Aśokan Edicts]. [*Ajātasatu*, *Ajātasattu* or *Ajātaśatru* denotes, according to Buddhist derivation, ‘an enemy of one's father even before one was born.’ This derivation suggests an after-thought and can be credited only in so far as it is quite in consonance with what the Buddhist thought of *Ajātaśatru*'s character as a son. In the Jaina books, the king of this name is called *Kuṇḍiya*, *Kunika* or *Kūṇika*, and this latter name is evidently intended to mean ‘one with a crooked hand and cunning disposition.’ But

*Ajātaśatru*¹ is also the name of an earlier Indian king mentioned in the Kauṣītaki and Brhad-Āraṇyaka Upaniṣads. There he is represented as a good king of Benares, noted for his ability for philosophical discussions. In this older context, *Ajātaśatru* cannot be supposed to have been used in a contemptuous sense. *Ajātaśatru* seems to have been intended to mean 'one whose enemies were not (lit. not born).' *Vamdate* does not mean a simple act of bowing down as understood in the West. The process of bowing implied in Buddhist or Indian *vandanā*, considered as a physical act, carries with it the idea of kneeling down with folded hands, touching the feet of the *Guru* or deity, the head or face stooping down to rest thereon. This meaning of *vandanā* is clear from the parallels quoted from the Pāli and other sources. This is also corroborated by the figure of *Ajātaśatru* in the Barhut sculpture.] N

[We have not much to add to Cunningham's notes. *Mahārāja* is the common designation applied in Buddhist books to *Dhṛtarāṣṭra*, *Virūḍhaka*, *Virūpākṣa* and *Kuvera*. It is rather unusual that each of them should be called a *Yakṣa* in the Barhut inscriptions. It is certainly not a departure from the Buddhist literary tradition. There are a few passages where *Kuvera* is styled a *Yakṣa*. As a *Dhanada* or giver of wealth, he deserves to be called a *Yakṣa*. It would seem that the term *Yakṣa* has been used in the Barhut labels in a special sense to denote 'a mighty hero or warrior.' Cunningham has not noticed that *Kuvera* has been described in the *Lalita-Vistara* as a *naravāhana*, 'one whose vehicle is man.' The figure of *Kuvera* as

sculptured on the Barhut railing distinctly follows the tradition as found in the Lalita-Vistara. The Pāli *Ātānāṭiya-Suttanta* contains a description of *Uttarakuru*, in which *Alakamaṇḍā* or *Viśāṇā*, the capital of *Vessavaṇa Kuvera*, was situated. In this account we have mention of man, woman, young man and young woman used as vehicles. In the *Sutta-Nipāta-Comy Kuvera* is described as *nārivāhana*, 'one having a woman for a vehicle.'¹ We welcome the suggestion of Cunningham that the original meaning of *Kuvera* was 'the hero of the earth,' *Ku* meaning the earth and *Vira* the hero. That the *Yakṣa*-worship in its ultimate analysis is hero-worship is beyond dispute. *Kuvera* or *Kuvira* can also be derived as 'one who dominates the earth,' *kuṃ viśeṣena iratīti Kuverah*. According to later etymology, *ku* signifies *kutsita* or 'ugly.' The association of *Kuvera* with *Maṇibhadra* in the *Lalita-Vistara* is interesting. The *Ātānāṭiya-Suttanta* mentions *Indra*, *Soma*, *Varuṇa* and *Maṇi* or *Maṇibhadra* among the *Yakṣa*-generals. In the *Mahāvastu* and the *Lalita-Vistara*, *Sūryya* is associated with *Dhṛtarāṣṭra*, *Yama* with *Virūḍhaka*, and *Varuṇa* with *Virūpākṣa*.] N

[A *Yakṣa*, known by the name of *Ajakālāpaka*, appears as the interlocutor of a Buddhist Dialogue in the *Udāna*, which gives a brief account of his unexpected and undesired interview with the Buddha. The Dialogue lays the scene in *Pāṭali*, on a spot where the *Yakṣa*'s temple and palace stood. According to the *Udāna-Comy*, his temple and mansion were situated in *Pāvā*. The Dialogue says that the *Yakṣa* grew furious to see the Master seated in his throne, inside his guarded mansion. *Akkula-Bakkula* he cried, and produced various terrific sights to frighten the fearless and strange trespasser, who ventured to enter his sanctuary. This

¹ *Paramatthajotikā*, II, p. 370.

description is interesting as being suggestive of the frightful nature of the demi-god. There is no doubt that the Pāli *Ajakālāpaka* is the *Ajakālaka* of the inscription. Dr. Hultzsch rightly suggests that *Ajakālaka* is but the Sk. *Ādyakāla*, whom we might take to be a terrible embodiment of the ruthless unborn Time, destroying living beings, whose essence is immortality. The Barhut sculpture, coupled with the evidence of the Udāna-Dialogue and its Commentary, goes to show that in both the mythic cult and popular art, the all-devouring figure of Time or Death came to assume a stereotyped human form. With regard to the origin and significance of the name *Ajakālāpaka*, the Udāna-Commentary records that the *Yakṣa* loved to receive offerings along with the group of goats brought to him for sacrifice, that he caused living beings to be killed like goats, as well as that he felt appeased when men brought him offerings with the cry of the goat, the symbol of the unborn (*aja*). The *Yakṣa* was a hard-hearted and cruel personality, capable of supernatural powers. But so potent was the miracle of the Buddha's presence and instruction that it soon subdued the *Yakṣa* into a gentle listener to the noblest message of the man.] N

“The label seems to record a scene of Sūciloma Yakṣa’s interview with the Buddha.”

E

[The name of Sūciloma occurs as an interlocutor in two Pāli Dialogues, one incorporated in the Saṃyutta-Nikāya and the other in the Sutta-Nipāta. In both, his residence is said to be *Taṃkitamañca*, situated in Gayā. According to Buddhaghosa’s Commentaries, *Taṃkitamañca* was a *Taṃ*-shaped elongated platform or resting place. A *Taṃkitamañca* is really a cell looking from a distance like a mound, consisting of four pieces of stone slabs, supporting a larger piece, spread over them like a roof (and resting on another larger piece). The upper and lower pieces are horizontally rivetted to the four supporters, so that when the house is turned upside down, it remains all the same. Buddhaghosa also tells us that this curious dwelling house of the *yakṣa* was situated on a bathing tank in the vicinity of the village of Gayā. This was a place for pilgrimage, dirty on account of spitting, fluid secretion of the nose and other filthy matters excreted by persons coming from different quarters. The body of the *yakṣa* is said to have been covered with spine or prickle-like hair, serving as a means of protection and striking terrors. Whenever the *yakṣa* wanted to frighten other beings, he did so by raising erect his prickle-hair. He is said to have occasionally gone out of his cell for food. The behaviour ascribed to him is quite befitting a porcupine. Our suspicion begins to grow stronger on account of his association with another species of *yakṣa*, namely, the *Khara* or “Rough-skinned.” The body of *Khara* is said to have been covered with a rugged skin, marked by square bony plates, resembling so many pieces of bricks, set side by side. When he wanted to frighten other beings, he did so by raising erect his scales. The description of him resembles that of an alligator or crocodile (*suṃsumāra*). The Rāmāyaṇa describes *Khara* as a *Rākṣasa*, who was a brother to *Rāvaṇa*. *Khara* of the

Epic is found to be a dweller of a forest region near about the source of the Godāvarī, and there is nothing in the Epic description except certain general attributes to connect him with a crocodile. He is described in the Epic simply as a savage of heroic character, enormous physical strength and dreadful appearance. But Buddhaghōṣa's description can clearly indicate a process of how there evolved conceptions of *Sūciloma* and *Khara* as two human demi-gods from porcupine and crocodile like animals and reptiles. *Taṃkitamañca*, as described by Buddhaghōṣa, was a good shelter for both a porcupine and a crocodile, the former remaining inside the cell and the latter outside; and this can well explain the association of the two *yakṣas* in the popular mythology. In the Jātakas, a crocodile is described as a being of dreadful appearance (*ruddadassana*). One need not be surprised that the *yakṣas* of the *Khara* species are described in the Mahāsamaya-Suttanta as *Kumbhīra*. The *yakṣas* of the *kumbhīra* species are said to have been inhabitants of Rājagṛha, having their residence on Mt. [*Erakapatta* or *Erāpatha* is represented in the Vinaya Cullavagga and in the Khandhavatta-Jātaka as one of the four Nāga-kings.¹ In the Mahāvastu he is mentioned as one of the four immensely rich persons and is said to be an inhabitant of Taxila. Höernle's suggestion as to *Erapata* or *Erāpata* being a wrong spelling of *Airāvata* or *Airāvāṇa* is untenable. In the Vāyu-Purāṇa (LXIX. 70), *Airāvata* and *Ailapatra* are mentioned among the descendants of *Kadru*. The name of the Nāga-king requires explanations. The diversity of spellings is hopelessly confusing. *Erakapatta*, *Erapata*, *Elāpatra* and *Ailapatra* form one category. *Elāpatra* was, according to Hwen Thsang, the name of a tree. According to the Dhammapada-Comy, *Erakapatta* is the leaf of the *Eraka*-tree. Is this not fantastic? When a wrong Sanskritisation established the spelling *Elāpatra* or *Ailapatra*, it called forth a special mythology to explain it. Two explanations seem quite possible: either (1) that *Erāpatha* was a Prakritic form of *Erāprastha* or *Ilāprastha*, the city built by *Ilā* or *Aila*, or (2) that *Erāpatha* or the Sheep-beaten-track was the name of a caravan route that passed through

Takṣaṣilā¹ and ultimately lent its name to the city or locality itself. *Era* = *Eraka* = *Elaka* = *Meṇḍa* or *Meṇḍaka*, the ram. The Mahāniddeśa (p. 156) mentions *Meṇḍapatha* as the name of a country lying beyond *Ajapatha* and a sandy wilderness (*marukantāra*). According to the Apanṇaka and Vaṇṇu-(Jaṇṇu)-patha Jātakas (F. Nos. 1-2), this must have been situated to the west of a sandy desert that had to be crossed by the caravan merchants proceeding from Eastern India towards *aparānta*, a destination in the west. In most of the Buddhist stories, the *Yakṣiṇī* figures as the most revengeful metamorphosis of a co-wife who dies with a grim determination to devour the children of her rival. [The Barhut sculpture represents the goddess as a female figure of short stature, standing on an elephant and holding the branch of a tall tree to her left, which she embraces with her left hand and entwines with her left leg. If the tree had been a date-palm, as it may appear to be so, her name could be explained as denoting a goddess of the date-palm tree. In the Dhammapada-Commentary *Koka* occurs as the name of a hunter who used to hunt by setting dogs against the game (see *Koka-Sunakha-Vatthu*). If *Koka* could have been taken as an adjective of dogs, it would perhaps mean *koṇka*—'crying' or 'bemoaning,' and the goddess might be associated with the habit of screaming at night. But seeing that *Koka* has been expressly used in the Dhammapada-Commentary as the name of the hunter, one might be led to surmise that *Koka* was an aboriginal tribe, whose tutelary deities were known after it as *Koka's*. Inscriptions have been found out at Dinaipur referring to temples dedicated to a tutelary god called *Kokāmukhasvāmī*. It would be a mistake to regard this deity as the husband of the goddess *Kokāmukhī*, who is no other than the Barhut *Kokā*. *Kokāmukhasvāmī* is just another name of the Boar Incarnation. In the Vessantara-Jātaka (F. VI, pp. 525-6) *Kokā* occurs as a synonym for *sunakkhā*, and signifies watch-dogs or dogs used in hunting. This goes to prove that, whatever the description of the goddess, she is connected with hunting or hunter.] N

“Śrīmā—the goddess possessed of lucky grace.” Tr

{C. pp. 22, 136; Pl. 59 (Pls. XXIII. 1, LIV). H. No. 304. L. No. 770.}

[*Sirimā* is the feminine form of *Sirima* or *Śrīmat*. Both the masculine and feminine forms occur among the names of donors of the Barhut railing. If *Sirimā* be the Prakrit counterpart of Sk. *Śrīmat*, its feminine form must be taken as an equivalent of *Śrīmatī*, and not of *Śrīmā*. We mean that *mā* is merely a suffix and not the member of a compound. *Mā* came to acquire a significance exactly equivalent to that of *Śrī* or *Lakṣmī* as is evident from *Mādhava*, ‘the husband of *Mā*,’ an epithet of *Viṣṇu*, and later of *Kṛṣṇa-Viṣṇu*, in the Mahābhārata and the Purāṇas. This sense of identity between *Mā* and *Śrī* or *Lakṣmī* is maintained even in modern popular parlance. But the forms *Śrīmatī* and *Lakṣmatī* in the Lalita-Vistara and the Mahāvastu also prove that *mā* or *matī* was originally applied as a suffix. This use also survives in modern popular usage. *Śrīmatī* means one possessed of or endowed with beauty or lucky grace. It is quite possible that this twofold usage has been in vogue for a long time. The explanation of the confusion between *mā* as a suffix and *Mā* as an epithet denoting the goddess of Luck is partly philological and partly psychological. The confusion could not perhaps have taken place but for the Prakrit suffix *mā* which represents the stage of transition between

matī and *mā*. It may also be that *Sirimā* or *Śrīmā* is a word belonging to the same category as *aṇimā* and *laghimā*, all indicating abstractions, popularly known as attributes of the Divinity. In this case the suffix is not *mant* denoting possession but *iman* denoting state. If this supposition be correct, we can easily understand how *Sirimā*, like *Sirī* or *Śrī*, came to stand for an abstract conception and a concrete personality. The psychological explanation is that the idea of motherhood has always been associated with bountiful gifts, helping the preservation of life. The Buddhist literature, as is evident from the verses quoted above from the *Lalita-Vistara* and the *Mahāvastu*, presents us with *Śrīmatī* and *Śrī* as two distinct goddesses or as two distinct types of one and the same goddess. The Barhut sculptures offer us an artistic counterpart of the above. Amongst them we have representations of both *Sirimā* or *Śrīmatī* and *Sirī* or *Śrī*. The Buddhist texts, referred to above, represent *Śrīmatī* as peculiar to the south and *Śrī* as peculiar to the north. The Barhut representation of *Sirimā* or *Śrīmatī*, as shown by Prof. Rhys Davids, has a faithful correspondence in the modern iconography of South India, while the Barhut representation of *Śrī*, as a goddess seated with two elephants pouring water over her,¹ is the oldest instance of the most common representation of the goddess and figures of her, exactly in this form, can be bought to-day in the bazaars of Northern India (Buddhist India, pp. 217-221). Thus modern images of the goddess as found in the south and north of India corroborate the truth of Buddhist literary evidence. The *Siri-Kālakāṇṇi-Jātaka* (F. No. 382) describes *Sirī* as a *devadhītā*, and represents her as a daughter of *Dhataratṭha*, the guardian of the eastern quarter. Thus the *Jātaka* assigns *Sirī* or *Sirimā* to the east. The explanation perhaps is that the *Śrīmatī* type of the goddess of Luck was a local deity of the south and of the east beyond the ancient Aryandom. Further, it is apparent from the verses in the *Lalita-Vistara* and the *Mahāvastu* that *Śrīmatī* or *Sirimā* was just one of four varieties of the goddess prevalent in the south, the others being *Yasahprāptā* or *Lakṣmīmatī*, *Yāsamatī* and *Yāsodharā*. Similarly we have in them *Śrī* (Graceful Beauty) represented as one of the four cognate goddesses, the rest being *Āśā* (Hope), *Śraddhā* (Faith), and *Hirī* or *Hirī* (Modesty). These with the exception of *āśā* and *Śrī* can be traced in the *Bṛhad-Āraṇyaka Upaniṣad*²; these with

¹. *Padmāsthā padmahastā ca ghaṭoṭhṣiptajalaplutā*.

the exception of *āśā* can be traced in the Taittiriya Upaniṣad¹; and these with the exception of *śrī* can be traced in the Pāli Abhidhamma books as mental qualities or abstract virtues. *Śrī* in the Śrī-Sūkta of the Ṛg-Veda is represented both as an abstract principle and a goddess. *Śraddhā* also signifies both an abstract principle and a goddess in the Śraddhā-hymn of the Ṛg-Veda. *Āśā* and *śraddhā* occur in a twofold sense also in the seventh chapter of the Chāndogya Upaniṣad. *Śrī* finds mention, as Prof. Rhys Davids points out, in the Taittiriya Upaniṣad (1.4), 'in mystic conjunction with the dread deities of the Moon, and the Sun, and Mother Earth.'² In a similar context of the *Silakkhandhu*-section of the first thirteen Suttas of the Dīgha-Nikāya, we have an express allusion to the practice called *Sirivhāyana*, the invocation of *Sirī* or *Śrī*. It was evidently what the Buddhist would call a *Devadhārmika*, *Devapūjaka* or idolatrous Hindu practice. But from the elucidation of the expression by Buddhaghosa, it is rather doubtful whether *Śrī* is an abstract virtue or a concrete image, though both the ideas are there, the concrete predominating over the abstract. A similar conflict of the concrete and the abstract exists in the Buddhist treatment of *Śrī* in the *Siri-Jātaka* (F. No. 289). Prof. Rhys Davids thinks that *Śrī* or *Sirī* was already a popular deity in the Buddha's time, whom the priests, i.e., the Brahmins, had been compelled to assign a place in their pantheon, and that on the strength of a special legend³ invented to excuse their doing so.⁴ The arguments advanced in support of this remark are that *Śrī*, the goddess of Luck, of plenty and success, is not mentioned in the Veda at all, and that even the cognate deities, e.g., those of the Moon, and the Sun, and Mother Earth, though noticed in the Veda, are put far into the background compared with *Indra*, *Agni*, *Soma*, and *Varuṇa*.⁵ "But it is highly probable," says Prof. Rhys Davids, "that they really occupied a very much larger share in the minds of the people of India than these sparse notices in the Veda would tend to show."⁶ What Prof. Rhys Davids says is not the whole truth.

The name of *Śrī* as a personified principle of Beauty not only occurs in the Ṛg-Veda but a complete hymn, the famous *Śrī-sūkta*, is there found devoted to *Śrī*. Further, in the *Rayī* of the Ṛg-Veda we can trace the Aryan prototype of a goddess of the type of *Sirimā*. *Rayī*, as conceived in the *Prāśnopaniṣad* (1.5) stands for the *Sāṃkhya Prakṛti* or phenomenality, manifested or unrecognised.¹ Here *Rayī* is a personified abstraction. We agree with Prof. Rhys Davids in thinking that there has been a constant tug of war between philosophy and popular belief, higher poetry and heathenism, throughout the whole course of Indian history. But the peculiarity is that neither of the conflicting parties is absolutely free from the influence of the other—the philosophy is inextricably mingled with idle popular notions, and with popular images there is implied a good deal of philosophical thinking, the concrete has always the touch of the abstract, just as the abstract has always the tendency to concretise or symbolise itself. Yet this grand distinction is always there that in the popular line the concrete has predominated over the abstract, while in the academic line the abstract has predominated over the concrete. The popular line in India, as perhaps in every other country, may be distinguished as Bhagavatic. The abstract conceptions suggested in the names of the deities of the Bhagavatic line, e.g., *Śrīmatī* and *Yaśomatī* are precisely the attributes of Divinity recognised in literature, and these signify not quality but condition, *śrī* or *śrīmā* meaning *śrī*-hood, *yaśū* meaning *yaśa*-hood. We mean that in the popular or Bhagavatic line the process of abstraction does not directly involve the metaphysical conception of an abstract principle or reality but a mere mental representation of a larger grouping of concrete associations, and that in the Vedic or academic line the process of abstraction involves the conception of a metaphysical principle or reality which cannot concretise itself in the tangible shape of images except through a poetic personification. The Jātaka mythology distinguishes between the Vedic *Śrī* and the popular one by representing the former as a daughter of Śakra or Indra and the latter as the daughter of Dhṛtarāṣṭra, the guardian angel. But of the three cognate qualities *Āśā*, *Śraddhā* and *Hrī* associated in the academic line with *Śrī*, none has been represented in the form of an image for worship, in spite of the fact that from the time of the Veda the process of personification, sufficiently strong in the verses of the *Lalita-Vistara* and the *Mahāvastu*, was in vogue.² The total exclusion of *Śrī* even

¹ Barua's History of Pre-Buddhist Indian Philosophy, p. 229; *Sarvaṃ mūrtiṇ ca amūrtiṇ ca tasmān mūrtir eva Rayīḥ*.

² It is rather surprising that there should be no image of three goddesses despite the vivid description of their characteristics given in the *Sudhābhojana-Jātaka* (F. No. 525).

as a mental quality from the Abhidhamma books of the Buddhists is to be sought in the fact of its being in constant association with popular idolatry. This explanation is emphasised by the absence of *Śrī*, *Srīmatī* and other cognate goddesses from Pāli counterparts of the verses of the Lalita-Vistara and the Mahāvastu, we mean, in the Ātānāṭiya-Suttanta of the Dīgha-Nikāya. The Siri-Kālakāṇṇi-Jātaka contains good Buddhist reasons for rejecting the goddess or the quality associated with her. In the Sudhābhōjana-Jātaka, too, one can find that *Śrī* is pushed far into the background.] N

“A brilliant example of renunciation set by the Bodhisat while he was born as king Mahādeva at his first perception of the fact of his old age on his being shown a grey hair plucked from his head by his hair-dresser.” E

[It is apparent from the parallel texts quoted from Buddhist literature that the name of the Bodhisat referred to in the label was written by the Buddhists both Makhādeva and Maghādeva, the latter spelling being met with nowhere else but the Culla-Niddesa or its Commentary. What is most noteworthy here is that the Niddesa reading *Maghādeviya* is precisely the same as *Maghādeviya* of the label. The Niddesa text clearly refers to the Jātaka in its *Sutta* or *Suttanta* form, i.e., to one like the story of *Makhādeva* or *Maghādeva*, the hero eponymos of *Videha*, as we find it in the *Makhādeva-Sutta* of the Majjhima-Nikāya.¹ It goes without saying that the Pāli texts preserve in *Makhādeva* and *Maghādeva* two Prakrit forms of Sk and Pāli *Mahādeva*.² One need not be surprised that the phonetic changes of *h* into *gh* and of *gh* into *kh* were peculiar to the dialects of *Videha*, in view of the fact that the name of the king of *Videha* is written *Māthava Videgha* in the Śatapatha-Brāhmaṇa instead of the Sk. or Pāli *Madhāva Videha*. In the instance just cited from the Brāhmaṇa we at once notice the change of *h* into *gh*, as well as of a sonant spirant *dh* into the surd spirant *th*. The change of *h* into *gh* was probably a common characteristic of dialects spoken over a much wider linguistic area as is evident from the occurrence of the form *Lāghulovāde* in Aśoka’s Bhabru Edict instead of Pāli *Rāhulovādo*. That is to say, the change of *h* into *kh* through an intervocal change of *h* into *gh* was confined to the dialects of *Videha* and of countries lying to the east of it. Even to-day

² The name is written *Mahādeva* in the Mahāvvyutpatti.

the people of Bakharganj District use the form *Makhādeva* when they try to correctly pronounce *Mahādeva*. Supposing that *Māthava Videgha* or *Mādhava Videha* of the Śatapatha Brāhmaṇa is the same person as *Makhādeva*, *Mughādeva* or *Mahādeva* of Buddhist texts it requires to be ascertained whether the form *Mādhava* considered as a personal name resulted from a curious and apparently inexplicable vocal contraction of *Mahādeva* or *vice versa*. The Mahābhārata is the oldest Indian text in which *Mādhava* occurs as a personal epithet of Vāsudeva Kṛṣṇa with a fantastic etymology—‘one who is the *dhava* or husband of *Mā* or *Lakṣmī*’. This etymology seems to have been invented at a much later age when *Mādhava* was permanently recognised as an epithet of Vāsudeva Kṛṣṇa’s and needed a plausible grammatical explanation. Failing to derive it as a patronymic of *Madhu*, as there was no ancestor of Kṛṣṇa’s of the same name, the grammarians sought to explain it by an ingenuous invention. It seems that in all earlier literary usages, the words either derived from or compounded with *madhu* in the sense of honey denoted honey-scented plants or honey-sucking insects. One may bear in mind that the vocal contraction whereby *Mahādeva* is converted into *Mādhava* is not altogether unknown in modern Indian dialects. Strangely enough, the *Marāṭhi*-speaking peoples pronounce *Mahādeb* as *Mādhāb*, e.g., *Mahādeb Rao* = *Mādhāb Rao*.] N

[*Ṭaṃ* as used in the label is an adverbial expression meaning ‘when.’ Though in the actual writing *h* is written after *m* in *brahmāno*, it is doubtful if in the actual pronunciation this was treated as a case of metathesis. But without assuming such a metathesis, it is difficult to account for the form *bambhāna* met with in the dialects of some of Aśoka’s Edicts.¹ *Avādesi* is a monumental Prakrit counterpart of the Pāli *avādesi*, from $\sqrt{vād}$ (to play on a musical instrument). The expression *avādesi* is quite appropriate and indispensable in a verse relating to *vīṇā*, which is a stringed instrument.] N

The label refers perhaps to the Bodhisat’s birth as a gambler. H. No. 21 and L. No. 710—*citupādasila* = *citra utpāta yatra sã silā*, ‘the rock where miraculous portents happen.’}

¹ Cf. RI. No. 3.

[The disputed point in the interpretation of the label is whether *citupādasila* is a compound like *manosilā* which is the name of a Himalayan mountain or it is similar to *keḷisilā* which means *the sportful*. If *silā* be *silā* meaning *rock*, *citupāda* must be equated with the Pāli *cittūppāda*, *thought-generating*, *thought-reading*, or *citruppāda*, *picture-producing*, *variegated*. In Buddhist literature there is a play upon the word *citta* in such an expression as *cittam cittato ra cittataro*, '*mind is even more variegated or picturesque than a picture*.' "The label may perhaps be taken to refer to a scene of a Jātaka-episode similar to one in the Asilakkhaṇa-Jātaka (F. No. 126)." E

[There can be little doubt that *Asadā* = *Āṣāḍhā*, a name which is derived from a famous constellation of stars, and may be taken to mean *the buxom*. *Susāna*, Sk. *śmaśāna* is literally the *corpses' lying-in ground*, a field or enclosure where dead bodies are thrown away, buried, exposed or cremated. Here it represents *the jackal-haunted charnel-field, where dead bodies were left unburnt* (Pāli *sinathikā*, *āmakasusāna* and Vedic *anagnidagdhacitā*, see Vedic Index, *sub voce* *śmaśāna*). *Ñāti* does not appear to be a verbal expression like *añāti*, *jānāti* meaning *knows*, *recognises*. instance of Māgadhism, *i.e.*, as a Nominative Singular form with the case-ending *e*. The construction is analogous to *Naḍode pavate*, which is definitely a Locative expression. *Cāṭiyaṃ* is not a mistake for *cetiyaṃ* but the Locative Singular of *cāṭi*, Pāli *cāṭi*, meaning a water-receptacle or trough. [Cunningham has very rightly pointed out that the title of the Birth-story as given in the Barhut label is unknown in Ceylon. In the Pāli Jātaka-Commentary, the Birth-story has been inopportunately split up into two portions, each bearing the title of a separate Jātaka, viz., Alambusā-Jātaka (F. No. 523) and Nalinikā-Jātaka (F. No. 526). The Lokottaravāda version of the second portion—the Nalinikā-story, is to be found in the Mahāvastu as well as in Nalinikāvadāna of the Avadāna-kalpalatā. The curious legend about the birth of the Bodhisat seems to have resulted from a fantastic interpretation of his name *Isisīṅga*, Sanskritised apparently in accordance with the popular fantasy as *Rṣyaśrīṅga*, the Horned Sage, or as *Ekasrīṅga*, the One-horned. *Isisīṅga* was probably an epithet signifying the high position of its bearer among the *Rṣis*, the towering figure among the sages]. “The episode illustrating Vidūra’s unsurpassed wisdom in frustrating the designs of Pūrṇaka to kill him and teaching the ideals of Dharma even at the risk of his life.” E

[*Vitura* of the label is evidently no other than the Bodhisat *Vidhura-Kumāra* or *Vidhura-Paṇḍita* of the *Vidhura-Paṇḍita-Jātaka* and the wise *Vidūra* of the Great Epic. The name of *Vidhura* or *Vidhūra* occurs in some four Jātakas, viz., *Vidhura-Paṇḍita* (F. No. 545), *Dhūmakāri* (F. No. 413), *Dasa-brāhmaṇa* (F. No. 495) and *Sambhava* (F. No. 515). In all but the last he is described as the hero, i. e., as the Bodhisat who served as a councillor and a teacher of law, morals and polity in the court of the Kuru-king Dhanañjaya of the Kuru kingdom, belonging to the family of Yudhiṣṭhira, while in the last or *Sambhava-Jātaka* he is represented as the *Purohita* of the king of Benares. It is the Commentary Jātakas that make this distinction between two *Vidhuras*; the Canonical ballads however seem to refer only to one *Vidhura*. It is strange indeed that the Canonical and the Commentary versions of the Birth-stories differ in certain important details of *Vidhura’s* life. The Commentary versions seek to describe him as a Brahmin and the son of a Brahmin, while the Canonical versions tend to represent him as a Kuru-councillor holding the status of a noble of the royal family of the *Kurus*, though born in a natural state of servitude. In this respect the Canonical account shows an agreement with the Epic. All the accounts, whether Buddhistic or Brahmanical, in spite of their differences on certain points, describe him as a man of sound moral principles and charming personality, leading literally a life of plain living and high thinking, and respected by all the princes and peoples of his time for his sanity, wisdom, foresight, character and solicitude for the good of all. The difference between the spellings of his name calls for an explanation. The spelling *Vitura* of the label stands phonetically nearer the Epic-*Vidūra* than the Pāli *Vidhura* or *Vidhūra*. Although some of the manuscripts of the Jātaka-Commentary contain the spelling *Vidura*, the correctness of the spelling *Vidhura* is vouchsafed by the Commentary’s play upon it, explaining it in the sense of *asama-dhura*, ‘one of

*unparalleled wisdom and ability.*¹ The name *Vidūra*, on the other hand, is sought to be derived from $\sqrt{\text{vid}}$ (to know) and explained in the sense of a wise man. One must admit that both the derivations ultimately come to the same thing. But this does not clear up the mystery about the original name or epithet of the Bodhisat. Höernle suggests that the Pāli *Vidhura* presupposes an earlier spelling, such as *Vithura*. This would no doubt sound very strange that *Vithura* was the epithet of so highly revered a teacher in view of the fact that it means in Sanskrit a demon, a thief, a nightranger. It may however be noted that *Vidhura* as he figures in the *Dasa-Brāhmaṇa-Jātaka*, advocates an opinion about the Brahmins of his time which could not be relished by them. And what is the usual way of the Brahmins? In the Great Epic they have turned a *Parivrājaka* of the *Tridandīn* class, a best of Brahmins, having the moral courage to criticise king *Yudhiṣṭhira's* conduct, into a *cārvāka* or 'men-eater demon,' because his opinion ran counter to their personal interest. They have represented the seer *Kaśapa* as a *Śūdra* because he had the courage to question the moral and spiritual value of hymn-chanting and sacrifice. They have described the *Śākyas*, the *Ājīvikas* and such other recluses as *Vṛśalas* or *Śūdrapravrajitas* because they ordained even the *Śūdras* in disregard of their *cāturvarṇya* ideal.² Instances need not be multiplied, for the cases here cited suffice to show how contemptuously they have handled persons holding an opinion or following a path different from or contrary to theirs. They were compelled even against their will to accept the Buddha as an *avatāra* because this was found to be the best way of keeping people on their side. It is conceivable that in the same way they had to give the Bodhisat a redeeming name *Vidūra*, the wise, and invent an etymology to explain it so, when in the course of time his ideals were widely accepted. The Buddhists who welcomed his ideals helped this process of regeneration by representing him not as a *Vithura* but a *Vidhura*. At any rate, this seems to be the only plausible explanation of the difference of spellings of his name.] N

¹ This ought to have been placed before two preceding labels.]

[Höernle's suggestion that the first word of the label refers to the *Jambu* tree wherefrom the *Jambudvīpa* or India derived its name cannot be entertained for this twofold reason: (1) that the correct reading of the first word is not *Jabu* but *Jabū*, and as such it does not mean one *Jambu* tree but many; (2) that the Buddhist legends about *Jambu* tree and *Jambudvīpa* do not explain the presence of the three human figures in the bas-relief. The word *Jabū* or *Jambū* exactly correspond to *Jambukā*, which might be taken as a catch-word of the verses expressing the lamentation of *Viśvantara's* wife.] N

{C. pp. 98, 131; CI. 18 (Pls. XLVIII. 9, LIII)—dohati = 'milks'; pavate = 'a continuous flow or stream.' Ho. No. 8—suggests Naḍoda is probably a proverbial expression founded on a story like the Nalapāna-Jātaka. H. No. 18—reads *Veḍuko*. L. No. 707.}

"The Birth-story in which a juicy balm had to be procured by Śakra, the thunder-bearer, from a Himalayan mountain Naḍoda (Nālada, Nārada or Gandhamādana) for the skin-disease of Vaḍuka, Vaṭuka or Vaḍika, the Bodhisat." E

[*Vaḍuka* of the label may be well equated with *Vaḍika* of the Vaḍika-Vastu (Avadāna-Śataka). If the reading *Vaḍika* be accepted, it may be interpreted as an epithet of Śakra, the thunder-wielder. *Katha* is probably *Kṣīrikām oṣadhi* of the Vaḍika-Vastu. *Naḍoda* seems to equate with *Nālada* or *Nārada*, and is obviously used as a synonym for *Gandhamādana*, *nala* or *nalada* meaning a scented plant or mineral. It is somewhat difficult to ascertain whether the label refers to one mount *Naḍoda*, or two mountains *Naḍoda* and *Pavata* (*ubho Nārada-Pabbatā*), or one mountain with two peaks.¹ The Vessantara-Jātaka (F. No. 547)

¹ According to the Purāṇas, Nārada was the name of one mountain and Nārada and Parvata were two offshoots thereof.

Vāyu, LXIX. 74.

mentions Mts. *Gandhara* or *Gandhamādana*, *Nārada* and *Parvata* in connection with the *Vaṅka* or *Vakra* mountain. *Vessantara* or *Viśvantara* is said to have lived in the heart of the *Vakra* range (*Vaṅkapabbata-kucchimhi*), where evidently two mounts *Nārada* and *Parvata* were situated.¹ This part of the range is also referred to as *Gandhamādana-saila*,² although there are verses in which *Gandhamādana* is mentioned as a mountain closely situated on the way to the *Vaṅka* or *Vakra* mountain.³ The probable explanation is that the range was either called *Vakra* or *Gandhamādana* of which *Gandhamādana*, *Vakra*, *Nārada*, *Parvata*, and the rest were separate mountains. So one need not be surprised that the Barhut labels invariably designate the mountain as *Naḍoda* or *Naḍoda-Parvata* instead of *Gandhamādana* of the Jātaka and Avadāna stories.] N

"The label is attached to a Jātaka-scene in which the Bodhisat then born as a king of elephants is in a position to drive away the lions from the spot or to the scene of a triangular lake guarded by dragons, elephants and lions." E

[*Tikoṭika* can undoubtedly be equated with *Traikūṭa*, the three-peaked. Here *koṭi* means an extremity or arm, and not a peak. But it cannot be denied that the scene is laid in a forest region where the elephants had the chance of coming in contact with lions and tigers.] N

"In this inscription all the letters have got the mātṛā's, or heads, which are found in the legends of the silver coins of Amoghabhūti, Dāra Ghoṣa, and Varmmika."⁵

Cunningham takes this Dhanabhūti to be Dhanabhūti II, son of Vādhapāla, mentioned in one of the Barhut inscriptions as son of King Dhanabhūti, *i.e.*, of Dhanabhūti I. Cunningham records that he obtained two copper coins of Agaraja, father of Dhanabhūti, one at Sugh, the old capital of Śrughna, and the other at Kauśāmbī, the coins of Amoghabhūti, king of the Kuniṇḍas, were found most plentifully along the upper Jumna. He also possessed two coins of king Balabhūti. Both of these princes were probably successors of Dhanabhūti II.

NOTES

I. ON PALEOGRAPHY.

(1) *Letters as Masons' Marks.*

Four Kharoṣṭhī letters found engraved as the masons' private marks on bases and capitals of the balusters of the ornamental arch of the E. Gateway are *p*, *s*, *a* and *b*, of which the first three occur twice. These may be, as suggested by Cunningham, the initials of words denoting numerals, viz., *p*=*pañca*, *five*; *s*=*sata*, *seven*; *a*=*aṭha*, *eight*; *b*=*bārasa*, *twelve* (= *ba*, *two*, acc. to Cunningham).

Twenty-seven marks found on different parts of the Great Railing are all Brāhmī letters.

The conclusion drawn from this is that the artists employed on the arch of the E. Gateway must have hailed from a N.W. region, where Kharoṣṭhī was the prevalent script, and the artists employed on the Railing itself must have belonged to other parts of India, where the prevalent script was Brāhmī.¹

(2) *Letters in Inscriptions.*

A. Gateway Inscriptions.—Some of the typical Brāhmī letters, carefully engraved on the four faces of two outer octagons in a lower pillar of the E. Gateway by the Western artists, whose script was Kharoṣṭhī, are shown below :—

A = 𑀅 : Two arms of different shape do not meet on the vertical but leave a proportionately large intervening space. Its development can be traced from the Aśokan form in Bühler's Table II, Siddapur (xii), and compared with *A* in Besnagar PI, Chanda's Pl. II, Sanchi Stūpa I and II Inscriptions, Chanda's Pls. III and IV, and Hāthigumphā and Nānāghāt Cave Inscriptions, Bühler's T. II (xxi, xxiv).

¹ Stūpa of Bharhut, p. 8.

$K = \dagger$. A hanging sword, a cross or a plus-sign with the elongated lower part of the vertical line. It compares favourably with K in Besnagar PI, Chanda's Pl. II, Sanchi Stûpa I Inscriptions, Chanda's Pl. III, and Hâthigumphâ, Bühler's T. II (xxi).

$G = \cap$. Markedly rounded top instead of a sharp angle. Its development can be traced from Aśokan forms in Bühler's T. II. Delhi (iv), and Siddapur (xi, xii), and compared with G in Sanchi Stûpa II Inscriptions, Chanda's Pl. IV (8-9). Compare the later forms in Bühler's T. II (xxi-xxiv), particularly the Mathura form (xx).

$Ch = \text{hook}$. A closed curve bisected by a vertical with a faint tendency to form a two-looped butterfly. Its development can be traced from the Aśokan form in Bühler's T. II. Jaugada (vii). It is similar to Ch in Sanchi Stûpa I. Inscriptions, Chanda's Pl. III (1-2), and to Ch in Mathurâ, Bühler's T. II (xx).

$J = \varepsilon$. Two curves of different shape meet in a line. Its development can perhaps be traced from the Aśokan form in Bühler's T. II. Kalsi (ii). Compare J in Hâthigumphâ, Bühler's T. II (xxi-xxii).

$T = \wedge$. A vertical on a sharp angle, the vertical appearing to be continuous with the elongated left arm. Its development can be traced from the Aśokan form in Bühler's T. II. Delhi (iv), and it compares favourably with T in Sanchi Stûpa I and II Inscriptions, Chanda's Pls. III, IV, and Mathura in Bühler's T. II (xx).

$D = \text{hook}$. Two verticals joined by a half square. Its development can be traced from Aśokan forms in Bühler's T. II. Delhi (iv, v). It compares favourably with D in Besnagar PI, Chanda's Pl. II, Sanchi Stûpa I and II Inscriptions, Chanda's Pls. III, IV, and Mathurâ in Bühler's T. II (xx).

$P = \cup$. The lower part approaching the printed English capital U. Its development can be traced from the Aśokan form in Bühler's T. II. Delhi (iv). It compares favourably with P in Besnagar PI, Chanda's Pl. II, Sanchi Stûpa I and II Inscriptions, Chanda's Pls. III and IV, and differs from the perfect U form in Sanchi Gateway Inscriptions, Chanda's Pl. VI.

$Bh = \text{hook}$. Two right verticals above and below the horizontal upper line of Aśokan Bh meet in a straight line with the markedly elongated lower part.

R = | . A cork-screw-like lightning form tending to be straight and sword-shaped. Its development can be traced from *R* in Aśokan Inscriptions and Besnagar PI. It compares favourably with *R* in Sanchi Stūpa I and II Inscriptions, Chanda's Pls. III, IV, and Mathurā in Bühler's T.II. (xx).

V = . High circular lower part. Its development can be traced from the Aśokan form in Bühler's T. II. Siddapur (xiii). It compares favourably with *V* in Besnagar PI, and Sanchi Stūpa I and II Inscriptions.

S = . The Gateway *P* with a tail composed of a perfect semicircle. Its development can be traced from the Aśokan form in Bühler's T. II. Jaugada (vi). It compares favourably with *S* in Besnagar Pl, Chanda's Pl. II, Sanchi Stūpa I and II Inscriptions, Chanda's Pls. III, IV.

B. Coping Inscriptions.—Some of the typical Brāhmī letters, engraved in varying degree of carefulness on the rectangular blocks above some of the Coping-panels by different sculptors apparently of the same period are as follows :—

A = λ . Two arms forming a sharp angle on the vertical, the lower arm being continuous with a vertical. Somewhat similar to the Aśókan form in Bühler's T. II. Gīrnar (x).

A = y. Two uniform arms making an angle on the vertical. An inverted Eran form in Bühler's T. II. (i).

A = Y . Two uniform arms making a wide angle on a short horizontal meeting the vertical. Similar to Aśokan forms in Bühler's T. II. Girnar (x).

A = . Two arms of different shape meet the vertical, leaving a small space between them; cf. Aśokan form in Bühler's T. II. Siddapur (xii), A in Hāthigumphā, Bühler's T. II, (xxi).

K = +. A cross-shaped plus-sign, the horizontal and the vertical intercrossing each other in the middle. Perfectly Aśokan, Bühler's T. II.

G = Λ . A sharp angle with the right arm slightly curved and convex. Similar to the Aśokan form in Bühler's T. II. Girnar (viii). It compares favourably with *G* in Besnagar PI and Sanchi Rail Inscriptions, Chanda's Pls. I-IV.

G = \cap . Two convex arms forming a sharp angle. Perfectly similar to the Aśokan form in Bühler's T. II. Kalsi (iii).

G = \cap . A slightly rounded top. An exceptional form similar to *G* in Bühler's T. II. Daśaratha (xvii).

Ch = . A high-curved ellipse bisected by a vertical. Similar to the Aśokan *Ch* in Bühler's T. II. Jaugada (vii), to Mathurā *Ch* in Bühler's T. II. (xx). Compare Sanchi forms, Chanda's Pl. III. Nos. 1, 12.

J = . A vertical crescent bisected by a short horizontal. An accidental form resembling Aśokan *T̃ā* in Bühler's T. II. Kalsi (ii), Delhi (iv) Mathurā *T̃ā* in Bühler's T. II. (xx).

J = . The forms approach the printed English capital E. Compare the Aśokan form in Bühler's T. II. Kalsi (ii). Bhaṭṭiprolu *J* in Bühler's T. II (viii).

J = . Two vertical curves meet in a horizontal. Similar to Aśokan forms in Bühler's T. II. Jaugada (vi-vii).

Jā = . *J* with a prolonged horizontal stroke in the upper half.

T = . A sharp angle with an upper vertical. Similar to Aśokan form in Bühler's T. II. Girnar (ix), and Mathurā *T* in Bühler's T. II. (xx).

T = . A sharp angle with the elongated left arm. Its development can be traced from the Aśokan form in Bühler's T. II. Girnar (x). Compare Mathurā *T* in Bühler's T. II. (xx).

T = . A slightly rounded form. Perfectly similar to the Aśokan form in Bühler's T. II. Kalsi (ii).

D = . See the Gateway form. Similar to Aśokan forms in Bühler's T. II. Delhi (iv-v).

P = . A vertical continuous with a lower sharp curve. The form is perfectly Aśokan.

Bh = . Two right verticals of Aśokan *Bh*, with equal length, merging in a straight line. It compares favourably with some of the letters in Sanchi Rail Inscriptions, Chanda's Pl. III. Nos. 2, 10, 11. The Aśokan *Bh* where the two right verticals form an angle, lingers in Besnagar Pl. Chanda's Pl. II, and the form where two right verticals remain above and below the horizontal with a short intervening space, lingers in some of the Sanchi Rail-pillar Inscriptions, Chanda's Pl. III. No. 8.

Y = . A vertical upon a horizontal crescent. Similar to Aśokan forms in Bühler's T. II. Kalsi (ii, iii), Girnar (viii, x), and to *Y* in Besnagar Pl. Chanda's Pl. II.

Y = . A vertical upon a high-curved horizontal. Similar to Aśokan forms in Bühler's T. II. Siddapur (xi-xii). It compares very favourably with Y in Sanchi Rail Inscriptions, Chanda's Pl. IV.

Y = . Anchor-shaped. An exceptional form, the development of which can be traced from the Aśokan form in Bühler's T. II. Delhi (iv-v). Similar to the Aśokan form in Bühler's T. II. Jaugada (vii) and Hāthigumphā Y in Bühler's T. II. (xzi-xxi).

R = . A straight vertical with equally thick ends. The type appears to be peculiarly Barhut.

V = . A vertical on a circle or a rounded curve tending to be triangular. The form stands near to Aśokan forms in Bühler's T. II. Kalsi (ii-iii), Delhi (iv-v), Jaugada (vi), Girnar (viii) and Siddapur (xi-xii).

V = . See Gateway form.

S = . A Coping P with a tail composed of a shorter horizontal continuous with a straight vertical. Exactly like the Aśokan form in Bühler's T. II. Siddapur (xi).

S = . The angular tail formed by two slanting arms of equal length. It stands near to Aśokan forms in Bühler's T. II. Kalsi (ii), and Jaugada (vi).

H = . A Coping P continuous with a short horizontal. See Gateway form.

C. *Rail-Pillar, Rail-Bar, Rail-Panel and Rail-Medallion Inscriptions*—The following are some of the typical Brāhmī letters, engraved at different times in the varying degree of carefulness by different artists (masons and sculptors) of different localities, where the Brāhmī was or was not the prevalent script:—

A = . Two arms of different shape making an angle almost on the vertical. It stands near to Aśokan forms in Bühler's T. II. Kalsi (ii), Girnar (ix).

A = . A sharp angle upon a short horizontal. Compare Aśokan forms in Bühler's T. II. Kalsi (ii), Jaugada (vi), Girnar (viii), and Bhaṭṭiprolu, Bühler's T. II. (xiv).

A = . An angle on a short horizontal with two arms tending to be verticals. Compare Aśokan forms in Bühler's T. II. Kalsi (iii), Girnar, (x), and Bhaṭṭiprolu, Bühler's T. II. (xiii).

A = . Sharply turned lower arm and larger intervening space. Similar in some respects to the Aśokan form in Bühler's T. II. Siddapur (xii). Exactly like Gateway form.

A = . Coping 4th form with larger intervening space. Similar to Sanchi Rail forms, Chanda's Pl. III.

A = . Two high arms with a small intervening space.

A = . A rounded angle bisecting the vertical. Compare Aśokan forms in Bühler's T. II. Siddapur (xii), Sanchi Rail Inscriptions, Chanda's Pl. III. Nos. 2, 4, Mathurā and Hāthigumphā, Bühler's T. II. (xx, xxi).

K = . A perfect plus-sign. See Coping form.

K = . Two verticals meet in a curve.

K = . Sword-shaped vertical. } Compare K in Besnagar Pl. and
Elongated lower part of } Sanchi Rail Inscriptions.
the vertical.

G = . Sharply angular. See Coping 1st form.

G = . Sharply angular with the elongated left arm.

G = . Slightly rounded top. See Coping 3rd form.

G = . Markedly rounded top. Exactly like Gateway form.

Ch = . Circular curve bisected by a vertical. Similar to Aśokan forms in Bühler's T. II. Delhi (iv), Girnar (viii, ix). C in Chanda's Pl. III. Nos. 5, 9, 11, 12, Pl. IV. No. 10.

Ch = . Similar to Gateway form.

Ch = . Butterfly with two loops, similar to the Aśokan form in Bühler's Pl. II. Kalsi (ii), and less prominent than Pabhosa C in Bühler's T. II. (xix), and Hāthigumphā, Bühler's T. II. (xxi).

J = . Similar to Coping 1st form.

J = . Two uniform curves meet in a horizontal. Similar to Coping 3rd form.

J = . Two vertical crescents meet in a point. Compare Ghasundi J, Bühler's T. II. (xvi).

J = . Two uniform curves meet in a narrow loop. Similar to Aśokan form in Bühler's T. II. Girnar (viii). Compare Sanchi Rail form, Chanda's Pl. III. No. 3.

$J\bar{a} = \text{Ξ}$. Two uniform curves joined by an elongated horizontal. Similar to the Aśokan form, Bühler's T. II. Jaugada (vii). This is also met with on the Coping.

$J\bar{a} = \text{Ξ}$. An ordinary J a vowel sign for \bar{A} in the upper half. Compare Hāthigumphā, Bühler's T. II. (xxi). This occurs in two Coping inscriptions.

$J\bar{a} = \text{Ξ}$. A three-curved J with a markedly elongated horizontal stroke in the lowermost curve. The form is unique.

$T = \text{Λ}$. This peculiar form occurs once in the Jetavana-scene Inscription.

$T = \text{Λ}$. These two inverted forms occur in the same Jetavana-Scene Inscription.

$T = \text{Λ}$. A sharp angle with the elongated left arm. Similar to Coping 2nd form.

$T = \text{Λ}$. A rounded top. Similar to Gateway form.

$D = \text{b}$. Similar to Coping and Gateway forms.

$D = \text{b}$. Two verticals joined by a rounded angle. Similar to the Aśokan form in Bühler's T. II. Girnar (x).

$D = \text{b}$. Two verticals joined by a small angle. Similar to Daśaratha form, Bühler's T. II. (xvii), and Pabhosa, Bühler's T. II. (xix).

$N = \text{L}$. The typical Brāhmī form in Barhut and all earlier Inscriptions.

$N = \text{L}$. Slightly bent top of the vertical. This exceptional form occurs twice in the same Jetavana-Scene Inscription along with the standard form.

$Bh = \text{r}$. Similar to Coping form.

$Bh = \text{r}$. Coping form with slightly longer lower part of the right vertical.

$Bh = \text{r}$. Markedly elongated lower part of the right vertical. Exactly like Gateway form.

$Y = \text{U}$. Similar to Coping 1st and 2nd forms.

$R = \text{I}$. Exactly like Coping form.

$R = \text{I}$. Sword-shaped. Similar to Gateway form.

Kr = . R-sign is cork-screw like or lightning-shaped. Exactly like Aśokan *kr*, Bühler's T. II. Siddapur (xi).

Dr = . Another form of cork-screw-like R-sign.

S = . Similar to Coping 1st form.

S = . Like Coping 2nd form.

S = . Like Gateway form.

H = . See Coping and Gateway forms.

(3) CHRONOLOGICAL POSITION OF BARHUT INSCRIPTIONS

A. Views of Paleographic Experts:—

Cunningham.—“According to my judgment the absolute identity of the forms of the Bharhut characters with those of the Asoka period is proof sufficient that they belong to the same age. On this evidence I do not wish to fix upon any exact date, and I am content with recording my opinion that the alphabetical characters of the Bharhut inscriptions are certainly not later than B.C. 200.”¹

Bühler.—“The majority of the inscriptions on the Bharhut stûpa” belong to “the older Maurya alphabet of the Asoka edicts.”²

Senart.—“The ancient inscriptions of the Bharhut Stûpa are perhaps contemporary with Piyadasi, of a surety not much later.”³

Chanda.—“The Brāhmī inscriptions from the third century B. C. to the second century A.D. may be chronologically arranged in the following order:—

1. Edicts of Aśoka.
2. Nāgārjunī Hill cave inscriptions of Aśoka's grandson Daśaratha.
3. Besnagar Garuḍa pillar inscriptions.
4. (a) Inscriptions on the railings of Stûpa I at Sāñchi.
(b) Inscriptions on the railings of Stûpa II at Sāñchi.
(c) Bharhut railing inscriptions.
(d) Inscriptions on the remnants of the old Bodh-Gayā railing.
5. (a) Besnagar Garuḍa pillar inscription of the year 12 after the inscription of *mahārāja Bhāgavata*.

³ Inscriptions of Piyadasi, Grierson's Translation, IA, 1892, p. 178.

(b) Inscriptions of Nāyanikā, widow of the Andhra king Sātakaṇi I in the Nānāghāt cave.

(c) Bharhut *torāṇa* (gateway) inscription.

6. Hāthigumphā inscription of Khāravela, king of Kalinga.

7. Sāñchi *torāṇa* inscriptions.

8. Inscriptions of the time of Śoḍāsa."

B. Chanda's Arguments on four Test-letters A, Bh, R, H.—

The angle formed by the two arms of *A* meeting at a point on the vertical line is the characteristic of almost all the *A*'s in Aśokan edicts, and *A*'s and *Ā*'s with the arms that do not meet but leave a little intervening space between them are exceptional. As *A*'s or *Ā*'s of these two descriptions occur side by side, neither type can be considered as a local variety, but the latter may be recognised as an irregular form of the former. In the inscriptions of Daśaratha the arms of all the *A*'s make a sharp angle on the vertical line. In the older Sāñchi Rail inscriptions *A* with space between the arms is the rule and *A* with an angle made by the arms is the exception.

Most of the Aśokan *Bh*'s consist of two lower verticals with a horizontal line above them extending a little beyond the top of the right vertical, and with an upper vertical attached to its right end. But here and there we meet with *Bh*'s of two other types, in which the right lower and upper vertical lines, meet and either make an angle or form one straight line. In the inscriptions of Daśaratha all three types are met with. In the *Bh*'s of the Besnagar PI of Heliodoros the verticals meet and make an angle. In the older Sāñchi Rail inscriptions the regular Aśokan *Bh*'s is practically absent, and almost all the *Bh*'s have one single long right vertical line.

R in the Aśoka edicts generally represents an ornamental cork-screw type, and an irregular type approaches a straight line. The *R*'s in the Besnagar PI of Heliodoros are cork-screw like. But in the older Sāñchi Rail inscriptions the *R* is represented by a straight vertical line, and the straight lined *R* is met with in all decidedly later Brāhmī inscriptions.

Two types of *H* are met with in the Aśoka edicts, often side by side. The more common type has the small horizontal line attached to the right shorter arm, a little below its top. In the second type this short horizontal line is attached to the top of the shorter arm. The second type

1. Memoirs, Archaeological Survey of India No. 1, pp. 14-15.

is also found exclusively in some of the pillar edicts, such as those at Radhia, Mathia, and Rampurva. In the inscriptions of Daśaratha all the *H*'s belong to the first type, while in the Sāñchi Rail and other decidedly post-Mauryan inscriptions the *H*'s represent the second type. So on, so forth.

C. Criticism.—The historical process behind the gradual transformation of Brāhmi letters is not so simple as may appear from Rai Bahadur R. P. Chanda's delineation. Certain forms became stereotyped at a particular period of time as an outcome of a very complex process, of the action and reaction of various factors. The shape of letters depends on the local style, the personal habit and temperament, the nature of the space and material, the position of the scribe, the nature of the tool, and the rest. And yet when we find that in none of the *Bh*'s occurring in two hundred inscriptions incised on different parts of the Barhut Railing the characteristic of Aśokan *Bh*'s with two right lower and upper verticals is present, and on the contrary, in all of them the *Bh*'s are of a type in which there is a single long right vertical with normal or prolonged lower part, we cannot but take it to indicate the peculiar development of an age, later than Aśokan, where the latter type of *Bh* is rarely met with. Similarly when in none of these inscriptions, and in none of the inscriptions which are decidedly post-Mauryan, the *H*'s with short horizontal attached a little below the end of the lower arm are met with, and on the contrary, in all of them the *H*'s are of a type met with in Aśoka's Pillar Inscriptions, we cannot but entertain the presumption that it is the characteristic of a post-Aśokan age. So far as Rai Bahadur's general statement of paleographic changes as a test of chronology is concerned, we have nothing to gainsay. But we find it really difficult to follow him when he, applying this test, comes to the conclusion that the Barhut Rail Inscriptions are later than the Besnagar Pillar Inscription of Heliodoros. In the epigraph of Heliodoros the *R* is of the cork-screw type, the *G* is angular, and the *Bh* represents one of the irregular Aśokan types in which two right verticals meet at a point to form an angle. Is this sufficient to prove that this epigraph is older than the whole of the Barhut and Sanchi Rail Inscriptions? If we closely examine all the letters in this epigraph, we cannot but have the impression that the general system, if there be any, is akin to that of the Inscriptions on the Barhut E. Gateway. In this epigraph the *A* has a markedly large intervening space between its two arms and represents a type which is absent in the whole of the Barhut

Coping Inscriptions, and rarely met with in one or two Inscriptions on the Rail-pillars and Rail-bars. This type of *A* can be traced in the Inscription of the Barhut E. Gateway. The *R*'s of the Barhut Gateway Inscription, like those of the epigraph of Heliodoros, are of the cork-screw type, though not so prominent as those in the latter. The *H*'s in both are equally sword-shaped with prolonged lower part of the vertical line. The *J*'s in the epigraph of Heliodoros are all looped, like the rare Aśokan form in Bühler's T. II. Kalsi (iii). This type of *J* is totally absent in the Barhut Inscriptions, and is met with in some of the Sanchi Rail Inscriptions, Chanda's Pl. III. No. 10. We are also unable to follow how Rai Bahadur, applying his test, can conclude that the Barhut Rail Inscriptions, are somewhat later than those at Sanchi. His analysis of the letter-types in Barhut Inscriptions is far from perfect. As regards Aśokan *A*'s, the distinction between two types with an angle and with a space between the arms is too broad to be of any real historical value. The Votive Inscription on the Barhut E. Gateway was evidently incised by the artists whose script was not Brāhmī but Kharoṣṭhī. Such Inscriptions can also be traced on the remnants of other two Gateways, as well as on some of the Rail-bars, and presumably on some of the Pillar-panels, added in the time of king Dhanabhūti. In this body of inscriptions we meet with certain special forms which recur in Mathurā, Hāthigumphā and Sanchi Gateway. The Barhut Coping Inscriptions show many forms of *A*, *V*, and the rest bearing likeness to this or that Aśokan form. Among the large number of Rail-pillar and Rail-bar inscriptions we trace different varieties of each letter, some going back to Aśokan forms and some remaining on a par with Gateway letters. The stage beyond the Gateway type is that of characters with thickened tops, *mātrā*'s or *serifs*. The solitary *Ch* on the Gateway is not of the butter-fly type but represents an ellipse-like curve bisected by a vertical, and tends to form two loops. The butter-fly type with two loops and without *serifs* occurs in some five Rail-pillar inscriptions attached to two interconnected sculptures, and this yet conforms to the Aśokan form in Bühler's T. II. Kalsi (ii). The explanation is that these two scenes were engraved by the same body of sculptors. The ornamental Barhut Railing was the joint work of the architects and sculptors, who represented different local traditions and belonged to different ages. The earlier inscriptions appear to have been incised by different artists (masons and sculptors), whose script was Brāhmī. The datas are however sufficient to establish that the

Barhut system is not exactly Aśokan but post-Aśokan, and definitely Mauryan and Śuṅga.

(11). CHARACTERISATION.

The orthography of the Votive Labels on the Gateways, particularly
of the label on the E. Gateway, seems to differ in some essential points
from that of the general body of inscriptions on the Railing. Two
diametrically opposite tendencies can be noticed in the two orthographies.
The former shows a predilection for the replacement of the dental nasal

(n) by the cerebral (ṇ), while the latter shows the predilection for replacement of the cerebral nasal by the dental. It is in the former orthography that we come across the use of the diphthong *au*, e.g., *paṭṭeṇa*. The predilection for the cerebral nasal argues a closer connection with the dialect of the Gateway Labels with the Jaina Prakrit, which, as is evident from a large body of inscriptions, held sway over the dialect or dialects of the Mathurā region. Barring the provincialisms, the language of the Barhut railing can be regarded as a Pāli dialect. The wordings of the Jātaka labels where the influence of the Pāli idiom is palpably strong, go however to show that the Scriptural source of the Barhut artists was not precisely the Pāli but a source of mixed character with the predominance of the Pāli elements. The Scriptural authority of the Barhut carvings was a Jātaka-selection including many legends all of which cannot be traced in the Pāli or any other particular tradition. It is on the whole an independent selection, including legends and episodes derived mainly from a source like the Pāli, while of the remaining legends and episodes, some can be traced only in the Lalita-vistara, some only in the Divyāvadāna, some only in the Mahāvastu, some only in the Avadāna-Śataka. The wordings of the Jātaka Labels bear some clear hints as to the mixed character of the Scriptural source. The Orthography, the Sandhi, the Declension, the Compounds, the Suffixes and the Phonetic Changes all combine to establish a close affinity to Pāli. But there are certain grammatical forms and phonetic variations which cannot be explained without a Mixed Sanskrit mediation. A few examples will suffice: Bhāriyā = P. bhariyā = Sk. bhāryā; Vipasino = P. Vipassissa = Sk. Vipasyinaḥ; Vesabhuno = P. Vessabhussa = Sk. Viśvabhuvah; Pasenaji = P. Pasenadi = Sk. Prasenajit. The Genitive singular forms Sirimasa, Mahamukhisa, and Dhanabhūtisa as well as the Feminine form devā are quite remarkable. These are apparently unwarranted by the Pāli or the Sanskrit idiom. The form Mahāmukhisa can be explained and justified only on the assumption that the final i of mukhi is equivalent to ya:—Mahamukhisa = Mahāmukhyasa. Bhichuni used as an alternative spelling of bhikhuni is rather curious. We cannot but welcome the suggestion of Dr. S. K. Chatterjee that there was probably a twofold pronunciation of Bhikṣuṇī, viz. bhikkhuni and bhikhyuni, prevalent in the central region of India, and that the Barhut bhichuni was based upon the second pronunciation, cf. Pāli accha = ṛkṣa; ucchu = iṣṇu

iii. ON NAMES AND EPITHETS.

(1). NAMES OF DONORS.

Bhikṣus—Apikinaka, Isidina, Isipālita, Kanaka, Kanhila, Gorakhita, Gula, Culadhaka, Jāta, Devasena, Nāṃda, Nāṃdagiri, Nāgadeva, Paṃthaka, Punāvasu, Budharakhita, Bhutaka, Bhutarakhita, Mahara, Mahādeva, Mahila, Valaka, Samaka, Samika.

Bhikṣuṇis.—Diganagā, Dhamarakhitā, Nāgadevā, Nāgā, Nāgilā, Pusadatā, Phagudevā, Budharakhitā, Budhikā, Bhutā, Sapagutā, Samanā (Sumanā), Sonā, Somā.

Donors other than Bhikṣus and Bhikṣuṇis : (Men)—Atanhata, Atimuta, Avisana, Ānāṃda, Isāna, Isidata, Isirakhita, Utaragidhika, Gagamita, Gosāla, Ghāṭila, Culana, Jitamita, Jeṭṭhabhadra, Thupadāsa, Devarakhita, Dhanabhūti, Dhamaguta, Dhamarakhita, Dhuta, Nāṃdagiri, Pusa, Pusaka, Phagudeva, Budharakhita, Bodhi (Budhi), Bodhiguta, Bharanideva, Bhutarakhita, Mahāmukhi, Mahīdasena, Mita, Muḍa, Yakhila, Yamita, Yasika, Revatimita, Valamita, Vasuka, Vādhapāla, Vijitaka, Velimita, Saghamita, Saṃghamita, Sagharakhita, Saghila, Satika, Samika, Sirima, Suladha, Seṭṭhaka.

(Women)—Anurādhā, Ayamā, Idadevā, Isirakhitā, Ujhikā, Kaculā, Kujarā, Koḍā, Koladalaki, Gorakhitā, Golā, Ghosā, Caṃdā, (?), Cāpadevā, Dhamarakhitā, Nadutarā, Nāgarakhitā, Nāgasenā, Pārikini, Pusadevā, Pusā, Mitadevā, Yakhi, Vāsīṭhi, Sakaṭadevā, Sakā, Samidatā, Sāmā, Sirimā, Seyā.

(2). OF PERSONS CONNECTED WITH KING DHANABHŪTI.

Kings and Princes—Visadeva, grandfather of king Dhanabhūti. Āgaraju, father of king Dhanabhūti.

Vādhapāla, son of king Dhanabhūti and donor of a rail-bar.

Queens—Gāgī, mother of king Visadeva and great grandmother of king Dhanabhūti.

Goti, mother of Āgaraju and grandmother of Dhanabhūti.

Vāchi, mother of Dhanabhūti.

Nāgarakhitā, wife of king Dhanabhūti(?) and female donor of a rail-bar.

(3). OF THE GOTRAS OF FEMALES IN VOTIVE LABELS.

Koḍina = Koṇḍañña = Kaṇḍiṇya (?)

Gaga = Gāga = Gārgya

Vacha = Vaccha = Vātsya.

Vāsiṭha = Vāsiṭha = Vāsiṭṭhya.

(4) OF THE RULING DYNASTY.

Suga = Suṃga = Suṅga (?).

(5) OF PERSONS IN THE JĀTAKA LABELS.

King —Ajātasata (Ajātasatu), Kaṃḍari, Pasenaji Kosalo, Maghādeva.

Queens—Ki[narā] (?), Sivalādevi.

Other personages.—Anādhapeḍika, Isisiṃga, Dighatapasi, Vaḍuka, Vasuguta, Vitura, Veḍuka, Sujāta, Susupāla.

Buddhas.—Vipasi, [Sikhi], Vesabhu, Kakusadha, Konāgamenā, Kāsapa, Sākamuni.

(6) OF PERSONS OTHER THAN HUMAN BEINGS.

Devaputas (gods).—Arahaguta, Brahma.

Devatās (goddesses).—Culakokā, Mahākokā, Sirimā.

Lokapāla Yakṣas.—Kupira, [Dhataratṭha], Viruḍaka, [Virupakha].

Other Yakṣas.—Ajakālaka, Gaṃgita, Suciloma, Supāvāsa (Supāvāsa).

Yakṣiṇīs.—Camdā, Sudasanā.

Nāgarājas (Dragon-chiefs).—Erapata (Erāpata), Cakavāka.

Acharās (Nymphs).—Alaṃbusā, Padumāvati, Misakosi (Misakesi), Subhadā.

(7) OF LOCALITIES OF DONORS.

Asitamasā, Karahakata, Kākaṃdi, Kosambi, Khujatiduka, Gula or Gola, Cikula, Cudatṭhili, Therākūṭa, Dabha, Naṃḍinagara. Nagara or Nagari, Nāsika, Paḍa or Paḍela, Parakata, Pāṭaliputa, Bahadagojatira (?), Bībikānadikata, Bodhicaka (?), Bhogavaḍhana, Bhojakata, Moragiri, Vidisā, Venuvagāma, Saṭupadāna (?), Sirisapada, Seriyāputa, Selapura.

(8) OF PLACES CONNECTED WITH JĀTAKA-SCENES.

Imḍasāla-Guhā, Kosala, Jetavana, Naḍoda-Pavata Parirepa, Yavamajhaka, Himavata (?).

(9) OF BUDDHIST CANON AND ITS DIVISIONS.

Piṭaka (Peṭaka)=the Canon.

Suttaṃ=Discourses as found in the Sūtra-Piṭaka.

Jātakam=the Birth-stories.

Paṃcanikāya=the five Nikāyas.

(10) OF CLASSES OF DEITIES.

Sudhāvāsa-devatā=the deities of the Pure Abodes.

Savata-nisisāni=the all-pervading deities.

Kāmāvacara=the deities of the sensuous plane.

(11) OF PARTS OF THE BARHUT RAILING.

[unisa, unhisa, uṣṇiṣa=the coping.]

torāṇa=the arch of a gateway, the gateway.

thabha, thaṃbha=the pillar.

suci=the rail-bar.

silākammanṭa=the stone-work, artistic designs in stone.

(12) PERSONAL EPITHETS.

1. *Those derived from the names of localities:—*

Karabakaṭika=of Karahakata.

Kosambeyakā=of Kosambi.

Kosalo (Kosalako)=of Kosala.

Khujatidukiya=of Khujatiduka.

Cikulaniya=of Cikula.

Cudatṭhīlikā=of Cudatṭhīli.

Therākūṭiya=of Therākūṭa.

Dabhinika=of Dabha.

Naṃdinagarika=of Naṃdinagara.

Nāsika=of Nāsika.

Paṇḍelaka=of Paṇḍa or Paṇḍela.

Parakaṭika=of Parakata.

Bhogavaḍhaniya=of Bhogavaḍhana.

Bhojakataka=of Bhojakata.

Venuvagāmiya=of Venuvagāma.

Seriyāputa = of Siriputa.

Selapuraka = of Selapura.

2. *Epithets other than geographical :—*

(a) *Secular*—Asavārika = the trooper.

Arāmaka (Ārāmika) = the gardener.

Ko. āya = the fort-keeper (?)

Mahāmukhi = the great local headman.

Rupakāraka = the engraver or sculptor.

(b) *Epithets denoting secular functions connected with monasteries—*

Avāsikā (Āvāsikā) = the resident nun of a monastic abode.

Dāyaka = the supporter of a monastic establishment.

Navakamika = the superintendent of building operations.

Bhatudesaka = the distributor of food.

(c) *Epithets denoting scriptural learning—*

Paṃcanekāyika = one who knows the five Nikāyas.

Peṭaki = one who knows the Piṭaka or Piṭakas.

Bhānaka = the repeater of texts.

Sutaṃtika = one who knows the Sūtras containing instructive discourses.

(d) *Monastic prefixes or titles of address—*

(i) *those of monks*—Aya = the Noble Master.

Bhadamta = the Most Gentle.

Bhadamta Aya = the Most Gentle Master.

(ii) *those of nuns*—Bhikhuni, Bhichuni = the Nun.

(e) *Epithets suggestive of tenets and practices—*

Bodhicaka = the bearer of the wheel as symbol of Bodhi (?).

Saṭupadāna = one who practises mindfulness (?).

(f) *Epithets and titles of address applicable to Buddhas—*

Bhagavā = the Divine Master.

Mahādeva = the Supreme Deity, the god of the gods.

(g) *Titles of address of ruling princes—*

Adhirāja = the subordinate potentate.

Kumāra = the prince.

Rājā = the king.

(h) *Epithets used as personal names—*

Anādhapeṭika = the feeder of the poor.

Dighatapasi=the ascetic of long standing.

Sākamuni=the Śākyan sage of mystic experience.

(13) BÜHLER ON NAMES AT SANCHI AND BARHUT. ¹

"The names of various lay donors and, I may add, of a few monks furnish also some valuable information regarding the existence of the Pouranik worship during the third and second centuries B.C. A very large proportion of the names, *e.g.*, Araha, Arahaka, Arahadata, Arahadina, Arahadāsa, Arahadāsi, Arahatapālita, Arahaguta, Dhamadata, Dhamaguta, Dhamarakhita, Dhamapālita, Budhita, Budhapālita, Bodhi, Sagha, Saṃghila, Saghadinā, Saghadeva, Saghamita, and Saṃgharakhitā is decidedly Buddhist. Another considerable number of proper names, *e.g.*, Asā'la, Mulā (*i.e.*, Mūlā), Muladatā, Phaguna, Poṭhāka, Poṭhādeva, Rohini, (Rohini), Sātika, Svatiguta, has been derived from the names of Nakshatras and points to the conclusion that the rule of some Gṛihyasūtras, which recommends the use of Nakshatranāmāni, was practically obeyed. The same inference may be drawn from almost all other collections of ancient inscriptions and from various ancient Brahmanical, Buddhist and Jaina works. There are further some names such as Agisimā (Agniśarmā), Agido(de)vā, Bahadata, (Brahmadatta), Mahida, Mita, Vesamanadatā, Visvadeva, Yamarakhita, which are closely connected with the ancient Vedic worship; and some Nāga, Nāgila, Nāgadata, and so forth bear witness for the existence of the snake-worship, which was common to the Brahmanists, and the heterodox sects. Finally the names Vinhukā, an abbreviation for Visnudattā, Visnurakkhitā, Upidadata, or Opedadata, (Upendradatta), Balaka, and Balamita (connected with one of the heroes of the legend of Krishna, Baladeva, or Balarāma, which is also called Bala) furnish evidence for the development of Vaishnavism, while Nadiguta (Nandigupta), Nandigiri, Sāmidata (Svāmi—, *i.e.*, Kumāradatta), Samika and Samikā (Svamika and Svāmikā); and Sivanadi (Sivanandi) do the same service to Saivism. It is also possible that Isadata and Himadata are likewise Saiva names. If the former has been correctly read, it corresponds to Sanskrit Isadatta. The other name can be connected with Himā, a name of Durgā. They may also be, however, derived from Hima, "The moon." The occurrence among the Buddhists of names connected with the ancient Vedic religion,

¹ Epigraphia Indica, Vol. II, Sanchi Stūpa Inscriptions, pp. 95-96.

as well as of such as are connected with Saivism and Vaishnavism, in these early inscriptions, has no doubt to be explained by the assumptions that their bearers or their ancestors, adhered to these creeds before their conversion, and that they received their names in accordance with the established custom of their families. The rules regarding the giving of names were probably then as lax among the Buddhists as they are in the present day among the heterodox sects of India, which by no means restrict themselves to the lists of their particular saints or deities. Their historical value consists therein that they form a link in the chain of evidence which enables us to trace the existence, nay the prevalence, of Vaishnavism and Saivism, not only during the third century B.C., but during much earlier times, and to give a firm support to the view now held by a number of Orientalists, according to which Vaishnavism and Saivism are older than Buddhism and Jainism. By exactly the same method of analysis which has been here applied to the names on the Sānchi Stūpa, it is possible to extract from those occurring in the Canonical works of the Buddhists the proof that the Purāṇik religions flourished at the time when those works were composed. If, *e.g.*, we learn from the Bhikkhupācittiya, II, I, that the ox of a Brahmin in Takshasilā was called Nandivisālo "as big as Nandi," it is not doubtful that the animal had received its name in honour of Siva's Vehicle, and that Saivism was popular at the time when the Suttavibhaṅga was composed and probably earlier."

IV. ON LOCALITIES.¹

1. ASITAMASĀ.—According to Cunningham, the place was situated somewhere on the bank of the Tamasā or Tons river. The Vāmana-Purāṇa mentions Asinīla and Tāmasa among the countries of Western India. Asi may be = Ṛṣi.

2. ĪMDASĀLA GUHĀ = Pāli Indasāla-Guhā, the Indrasāla-Cave. Indasāla Guhā is, according to Buddhaghosa, a Upanidhāpaññatti, *i.e.*, a name derived from an object standing at close proximity, say, from the Indrasāla tree marking the entrance of the cave. According to description in the Sakkapañha-Suttanta, the cave belonged to Mt. Vēdiyaka situated to the north of a Brahman-village called Āmraṣaṇḍa, the Mango-tract, and

¹ For some of the useful references we are much indebted to Mr. Kshirode Mohan Chakrabarty, M.A.

lying to the west of Rājagṛha, the capital of Magadha. Buddhaghosa says that the cave was situated between two hills or mountains, and that the Vedyaka mountain was so called because it was surrounded on all sides by yellow-coloured grassy and flowery woodlands looking like so many mañivedikās, all grown at its foot. Fa Hian and Hwen Tshang suggest a name for the cave in Chinese which corresponds to Sk. *Indraśailaguhā*-mountain (In-t'o-lo-shi-io-kia-ho-shan). *Indraśailaguhā* may be taken to mean 'the Cavern of Indra,' as Beal suggests, or 'the mountain-cave sacred to Indra.' Some such idea is also associated with the Pāli *Vedyaka-pabbata*. According to Fa-Hian, the cave and the mountain were situated nine *yojanas* to the south-east of *Pāṭaliputra*, and according to Hwen Tshang, it was situated 30 *li* or so to east of the town *Kālapināka*. Cunningham has identified the mountain referred to by the Chinese travellers with *Giryek*, which is the higher of the two lofty western peaks of the northern range of hills that stretch from the neighbourhood of *Gayā* to the bank of the *Pañcana* river, a distance of about 36 miles (*Arch. Survey*, Vol. I, pp. 16-18 ; Vol. III, p. 150 ; *Ancient Geography*, Nundo Lal Dey's *Geographical Dictionary sub voce* *Indraśila*). The following description of the mountain by Hwen Tshang is here worth quoting: "The precipices and valleys of this mountain are dark and gloomy. Flowering trees grow thickly together like forests. The summit has two peaks, which rise up sharply and by themselves. On the south side of the western peak between the crags is a great stone-house, wide but not high. Here *Tathāgata* in old time was stopping when Śakra, king of *Devas*, wrote on the stone matters relating forty-two doubts which he had, and asked Buddha respecting them. Then Buddha explained the matters. The traces of these figures still exist. Persons now try to imitate by comparison these ancient holy figures. Those who enter the cave to worship are seized with a sort of religious trepidation. On the top of the mountain ridge are traces where the four former Buddhas sat and walked, still remaining. On the top of the eastern peak is a *Saṅghārāma* ;before the *Saṅghārāma*.....is a *stūpa* which is called *Hansa* (*Keng-sha*). Formerly the priests of this *Saṅghārāma* studied the doctrine of the *Little Vehicle*" [Beal's Records, II, pp. 180-1 ; Watters' *Yuan Chwang*, II, p. 173. Cf. Beal's Records, *Intro.*, p. lviii.] One reads in the *Sakkapañha-Suttanta* : "At the time when the B lessed One entered, the *Indraśāla*-cave which was uneven became even,

which was narrow became wide, which was dark became bright, as if by the superhuman powers of the gods."

"Tena kho pana samayena Indasālagubhā visamā yanti samā sampadi, sambādhā yanti urundā (uruddhā) sampadi, andhakāra-guhāyaṃ devānubhāvena" (Dīgha., II, pp. 269-270). Buddhaghosa says that after having been surrounded with kuṇḍas, fitted with doors and windows, done up into a cave-dwelling with the finest chunam plaster and adorned with garland and creeper designs, the cavern was given to the Blessed One.

"Atha naṃ kuṇḍehi parikkhipitvā dvāravātapanāni yojetvā supariniṭṭhita-sudhākamma-mālākamma-latākamma-vicittam leṇaṃ katvā bhagavato adamsu" (Sumaṅgala-Vilāsinī, Siamese Ed. II, p. 392).

3. KARAHAKAṬA.—This is identified by Hultzsch with Karhād in the Sattara District.

KĀKĀNDĪ.—*Kākandī* of the Jaina Paṭṭāvalī and of the Buddhist literature. The location of the place is unknown. *Kākandī* was originally the abode or residence of *Ṛṣi Kakanḍa* (*Kakandassa nivāso Kākandī*), that is to say, it was, like Sāvattthī and Kosambī, a city that sprang up round a hermitage (Sutta-Nipāta-Commentary, Paramattha-jotikā, II, p. 300). It was the birth-place of a Jaina Tirthaṅkara.

KOSAMBĪ.—Pāli *Kosambī*, Sk. *Kauśāmbī*. This was in the time of the Buddha, as also before his advent, the capital of the country of the *Vamsas* or *Vatsas*. According to the Pauranic tradition, the royal dynasty of the Vatsa country, to which King Udayana belonged, traced its descent from Puru and once held its royal seat in the Kuru kingdom with Hastināpura as its capital (Pargiter's Dynasties of the Kali Age, see *Pauravas*). *Kosambī* was, according to the Prologue of the 5th Book of the Sutta-Nipāta, one of the important stopping places of persons travelling along the great trade-route connecting Sāketa and Sāvattthī in the north with Patitṭhāna or Paithan on the bank of the Godāvarī in the south. *Kosambī* is identified by Cunningham with *Kosam* on the Jumna, about 30 miles south-west from Allahabad. The Barhut inscription above referred to mentions *Venuvagāma* as a suburb of *Kosambī*. Cunningham identifies *Venuvagāma* with the modern village *Ben-Purwa* to the north-east of *Kosam*. According to the Sutta-Nipāta-Commentary, *Kosambī* was originally the residence of *Ṛṣi Kusumba* (*Kusambassa nivāso*, Paramattha-jotikā,

II, p. 300). *Kosambī* was one of the most well-known centres of early Buddhism.

KHUIJATINDUKA.—Sk. *Kubjatinduka*, Pāli *Khujjatinduka*. The location of the place is unknown. The Purāṇas mention *Kubjaka* and *Kubjāma* among the holy places of India.

GULA or GOLA.—The location of the place is unknown. The Purāṇas mention *Golaṅgula* as a country in the Deccan.

CIKULA.—Sk. *Cikula*. The location of the place is unknown. One of the Nasik Cave Inscriptions, L. No. 1133, mentions *Cikhalapadra* as a village. *Cikula*, *Cekula* = *Ceula*, probably *Caul*, near Bombay, EI, II, p. 42.

CUDATHĪL.—Sk. *Cundasthali* (?) The location of the place is unknown.

JETAVANA.—See *ante*, p. 60.

THERĀKUṬA.—Sk. *Sthavirakūṭa*. The location of the place is unknown.

DABHA.—Sk. *Darbha*. In the Brahmanḍa and a few other Purāṇas *Darva* or *Darbha* is mentioned as a country on the hills.

NAṂDINAGARA.—The location of the place is unknown. If it be the same as *Nandigrāma* of the Rāmāyaṇa, then it must be a town, such as *Nundgaon*, in Oudh.

NAGARA or NAGARI.—The location of the place is unknown. Was it a town in Western India?

NAṆODA-PAVATA.—See note *ante*, pp. 98-99.

NĀSIKA.—*Nasikī* or *Naisika* of the Purāṇas and *Janasthāna* of the Rāmāyaṇa. According to the Brahmanḍa-Purāṇa, it was situated on the Narmadā. *Janasthāna*, as appears from the Ramayanic description, was within the reach of Pañcavaṭī on the Godāvarī. It then guarded the approach to South India and was carefully fortified. *Janasthāna* came to be known as *Nāsika*, as the foolish popular tradition would have us believe, from the circumstance that here Śūrpanakhā's nose was cut off by Lakṣmaṇa. *Nāsika* is modern *Nasik*, which is about 75 miles to the north-west of Bombay. During the reign of the Sātavāhana kings of Andhra, *Nāsika* was a stronghold of the Bhadrāyāṇīya school of the Buddhists (L. Nos. 1122-1149).

PADA.—The identification of the place cannot be settled beyond dispute. In the Barhut inscription we have a geographical patronymic *Paḍelaka* which can be equated with Sk. *Pāṇḍeyya* or *Pāṇḍeyyaka*, a man

of *Pāṇḍya*. But *Paḍela* is evidently the ancient name of Paṇḍeria in Bilaspur District, Central Provinces.

PARAKAṬA—The location of the place is unknown.

PĀṬALIPUTA—Pāli *Pāṭaliputta* Sk. *Pāṭaliputra* or *Kusumapura*, *Pali-bhotra* of Megasthenes and of the Periplus. This was the ancient site of modern Patna and the last great capital of the kingdom of Magadha. This city was a mere village called *Pāṭaligāma* or *Pāṭaligrāma* in the time of the Buddha, and was situated on the south bank of the Ganges, just opposite Vaiśālī. King Ajātaśatru ordered his two Brahmin ministers Sunidha and Varṣakāra to fortify the village of Pāṭaligrāma as a means of repelling the attacks from the Vṛjīs or Licchavis of Vaiśālī. This, indeed, marked the commencement of the building of the city of *Pāṭaliputra*, *Pāṭalipura* or *Pāṭaliputrapura*. The Buddha had seen the building work of the city during his last journey from Rājagṛha to Vaiśālī, and an account of this will be found in the Mahāparinibbāna-Suttanta and the Udāna. According to the Jaina and Pauranic accounts, the capital was transferred from Rājagṛha to Pāṭaliputra by Udāyī or Udayabhadra, who was, according to the Buddhist dynastic list, the son and successor of Ajātaśatru. There are some Buddhist Suttas which bear evidence to the fact that the building work of Pāṭaliputra was completed in the life-time of Ānanda who had survived the Master. There is reason to believe that the capital was again removed to Rājagṛha, while it was finally transferred to *Pāṭaliputra* by Kākavarṇī Kālāśoka, about a century after Buddha's demise. *Pāṭaliputra* was the most prosperous capital of the Maurya Emperors. According to tradition King Aśoka had built there a big Buddhist monastery by the name of Kukkuṭārāma. Buddhaghōṣa says that *Pāṭaligāma* was so called because the village of this name was adorned with *Pāṭali* flowers. This can also explain the other name *Kusumapura* or the Flower-city. Hwen Thsang has recorded a curious local legend accounting for the origin of the name *Pāṭaliputra*. A certain Brahmin young man was made a bridegroom by his fellows and offered the twig of a Pāṭali tree as a bride. This circumstance gave rise to the name *Pāṭaliputra*, "the Son-in-law of Pāṭali." This fancy can never pass for sober history. The fact is that we do not know the exact meaning of the word *putra*. It was evidently a Sanskritised form of a Prakrit word *puta* or *putta*. One need not be surprised if the term *puta* was a phonetic variant of *pota*, meaning a merchant vessel, and was applied to a harbour or resting place of ships.

We have a few other names which can be similarly accounted for, to wit, *Kesaputta*, *Seriyāputa*, *Satiyaputa*, *Keralaputa*.

PURIKĀ—*Pulika* of the *Mahābhārata*; *Purikā* of the *Khila-Harivaṃśa*; *Paulika*, *Paurika* and *Saulika* of the *Purāṇas*. In the *Purāṇas*, this is included in the list of countries of the Deccan. In the *Vāyu*, the *Brahma*, the *Brahmāṇḍa* and the *Agni*, it is mentioned before *Danḍaka*, while in the *Vāmana*, it occurs after *Dinḍaka*, and before *Sārika*. Was it, like *Āsmaka* and *Maulika* situated in the *Golāvari* region and included within the principalities of the *Sātavāhana* kings of *Andhra*? In the *Khila-Harivaṃśa* (*Viṣṇuparva*, XXXVIII, 20-22),¹ the city of *Purikā* is placed between two *Vindhya* ranges, near *Māhiṣmatī*, and on the bank of a river flowing from the *Rṣavanta* mountain:—

Ubhayor Vindhayorpāde nagayos tām mahāpurīm |

Madhye nivēṣayāmāśa śriyā paramayā vṛtam ||

Purikām nūma dharmātmā purīm devapurīprabhām |

Udyānaśatasambādhlām samṛddhāpaṇacatvarām |

Rṣavantam samabhilastīre tatra nirāmaye ||

PĀRILEYYA=Pāli *Pārileyyaka*, Sk. *Pāreraka*. This was the name of a woodland guarded by the elephant *Pārileyya*. Failing to settle the dispute among the *Bhikṣus* at *Kauśāmbī*, the *Buddha* came away to live in this woodland, and spent there one rainy season, being attended by the elephant *Pārileyyaka* and a monkey. The way to this woodland from *Kauśāmbī* lay through a village called *Bālakaḷaṇakārā*, the saltmakers' village.

BAHAḌAGOJATĪRA—The location of the place is unknown. The name implies that the place was on the bank of a river crossed by bullocks, cows and goats.

BĪBIKĀNADIKĀṬA—This, as its name implies, was a place in the region of the *Bimbikā* river. But a river or a country of this name has not as yet been traced in any known list of geographical names in the *Epics* or the *Purāṇas*.

BODHICAKA=Sk. *Bodhicakra*. It is doubtful if this was the name of a place, though a similar name *Ekacakra* is met with in the *Pauranic* lists of countries and places.

BHOGAVADHANA=Sk. *Bhogavardhana*, the *Wealth-increaser*. The *Purāṇas* catalogue it as one of the countries in the *Deccan*. The *Vāyu*,

¹ For this reference we owe some debt to Dr. H. C. Raychandhuri.

the Brahma and the Brahmāṇḍa mention it after *Maulika* and *Aśmaka* or *Aśvaka*, while the Vāmana mentions it before *Aśmaka*. According to the Sutta-Nipāta, V. 977, and its Commentary, *Mulaka* (*Aḷaka*) and *Assaka* were two Andhra principalities situated near the forest region of the Godāvārī where Ṛṣi Śarabhaṅga and others lived. That these two were Andhra principalities is borne out by the Nasik cave inscriptions of the Śātavāhana kings of Andhra. It seems that *Bhogavardhana*, too, was situated in the Godāvārī region. The location of the place is however unknown.

BHOJAKAṬA=Sk. *Bhojakata* or *Bhojya*. The Sabhāparva of the Great Epic, Chap. 30, mentions *Bhojakata* and *Bhojakatapura* as two places in the south conquered by Sahadeva. If *Bhojakata* be the name as *Bhoja* or *Bhojya* of the Purāṇas, then it must be a country of the Vindhya region. The expression *Dāṇḍakyaabhoja* in the Brāhmaṇas may indicate that this *Bhojakata* was either included within or within the reach of *Dāṇḍaka*. It is clear from the Mahābhārata list that *Bhojakata* Illichpur was distinct from *Bhojakatapura* or *Bhojapura* the second capital of Vidarbha (modern Berar). In the Khila-Harivaṃśa (Viṣṇuparva, LX, 82), *Bhojakata* is expressly identified with *Vidarbha*:

“*Vidārbheṣu nirvāsārthaṃ nirmame'nyat puraṃ mahat,
Tad Bhojakataṃ ityeva bāhūva bhuvi viśrutam.*”

MORAGIRI=Sk. *Mayūragiri*. The location of the place is unknown. See note *ante*, p. 13.

YAVAMAJHAKA=Pāli *Yavamajjhaka*, Sk. *Yavamadhyaka*. The precise meaning of the name is not clear. In the Mahā-Ummagga-Jātaka, it occurs as a general name for four market towns distinguished as Eastern, Southern, Western and Northern according to their position near the eastern, the southern, the western or the northern gateway of the city of Mithilā, the capital of Videha. The Barhut label refers to the market town of the eastern gate which was the birth-place of Mahosadha or Mahauṣadha, the Bodhisat, the son of the wealthy banker Sirivaddhaka or Srivardhaka. “*Mithilāya pana catūsu dvāresu Pācīna-Yavamajjhako Dakkhina-Yavamajjhako Pacchima-Yavamajjhako Uttara-Yavamajjhako ti cattāro nigamā. Tesu Pācīna-Yavamajjhake Sirivaddhako nāma settṭhi ahoṣi.*” [F. J. VI, pp. 330-331.] The inhabitants of *Pācīna-Yavamajjhaka* are described as a wise and intelligent people (*pañḍitā*), while Mahosadha was the wisest of them. The stories illustrating Mahosadha's wonderful power of judgment clearly indicate the importance of the place. The *Kīlāsāla*

(*Kriḍāśāla*) erected by the Bodhisat is said to have been an object of pride to all and a lasting monument of his fame.

VEDISA=Pāli *Vidisa*, Sk. *Vaidīśa*. *Fedisa*, according to Cunningham, is the old name of *Besnagar*, a ruined city situated in the fork of the *Bes* or *Fedisa* river and the *Betwa* within 2 miles of *Bhilsa*. *Vaidīśa* was, according to the Purāṇas, situated on the bank of the *Vidīśā* river which took its rise from the Pāripātra mountain. The Garuḍa Purāṇa contains the following patriotic description of *Vaidīśa* :—

“Vaidīśam nāma nagaram sarvasampat sukhāvaham |

Nānājanapadakīnām nānāratnasamākulam |

Nānāpuṣpavanākīrṇam nānāpunyajanaṁvṛtam ||”

Vidisa came for the first time into prominence in Buddhism in connection with the viceroyalty of Aśoka. Aśoka, while he was a viceroy at Ujjain, married a *vaiśya* girl from *Vessanagara* or *Vaiśyanagara*, which was evidently the old name of *Besnagar*. Since the time of Aśoka it became a very important centre of Buddhism. The only other religion which vied with Buddhism in post-Aśokan time was Bhagavatism.

VENUVAGĀMA=See under *Kosambi*.

SAṬUPADĀNA=It is doubtful if it was the name of any place. See note *ante*, p. 15.

SIRISAPADA=See note *ante*, p. 27.

SERIYĀPUTA=The location of the place is unknown. The *Serivāṇija-Jātaka* (F. No. 3) mentions a kingdom by the name of *Serī*. The city of *Andhapura* could be reached by the merchants from *Serī* by crossing the river *Tailavāha*. It seems that *Seriyāputa* was, like *Suppāraka* and *Bharukaccha*, an important port on the western coast of India.

SELAPURA=Sk. *Śailapura*. The location of the place is unknown.

HIMAVATA=Pāli *Himavanta*. The region denoted by this term is rather vague and indefinite. It denoted undoubtedly a region along the southern foot of the Himalayas. It excluded *Kuru*, *Pañcāla*, *Kapilavasthu*, *Pāvā*, *Kusinārā* and other places included within the Middle Country as described by the Buddhists. It must have represented a region covered by Nepal excluding the Terai, Sikkim and Bhutan. In post-Aśokan times a local Buddhist school by the name of *Haimavata* arose as a seceder from *Śthaviravāda*.
